KABE 2023

Motorhome

Welcome to KABE!

Our goal is to always be a step ahead and surprise you with technology and features beyond the ordinary. With functions that elevate your lifestyle and increase your quality of life, no matter where you are. It can be a challenging adventure, or peaceful and relaxed. Just like home, but in a new place. The focus is always comfort and safety, spiced with smart solutions for a greater experience and smoother holiday on the road, in any season.

KABEs motorhomes are some of the most well-equipped in the market, at every price level. We invite you to find your favourite!

2023 MODEL PROGRAMME

We present five KABE motorhome series. Each with its own characteristics, design and functional focus – always with superior quality in mind. In 2023, we introduce our brand new KABE NOVUM.

Evolution – KABE Van

Smart and deliberate for a carefree lifestyle. Our sensible KABE Van, is evolution of the best kind. Optimised and compact in size, without compromising KABEs high standard and Mercedes-Benz many added values. KABE Van is available with twin wheels which increases the load weight by approximately 850 kilos for a permissible vehicle and trailer gross weight of 7 tonnes. Perfect if you want to tow a horse trailer, heavy work equipment or a boat.

Definition – New KABE Novum

Mercedes-built KABE Novum with a chassis from AL-KO is a straightforward semi-integrated motorhome in Crossover design. It is the perfect choice when you want a complete camping vehicle with full KABE-standard and a total weight of 3,5 tons (Light) – without a special driver's license requirement! KABE Novum is 7,50 metres long. It is available in 4,5 ton weight (Heavy) as an option, with space for a retractable loft bed above the dinette area (option for Novum Heavy).

Revolution – KABE Royal

Semi-integrated KABE Royal offers excellent quality, lots of flexibility and is a pleasure to drive. The vehicle is 2,50 metres wide and equipped with an extra retractable loft bed. Royal is built on a base from Mercedes-Benz Sprinter with a chassis from AL-KO. A few examples of what's included are 170 HP engine, 9-speed automatic transmission, Heavy-Duty, leather steering wheel, automatic brakes, 10,25 MBUX and attention assist. The motorhome is available in 780 and 880 length.

Innovation – KABE Crown

KABE Crown is our integrated premium series, with outstanding design and a standard equipment list far beyond the ordinary. Crown is developed for those who want the very best, but also appreciate the possibility to choose a motorhome that is not the very largest. Our Crown-models are built on a base from Mercedes-Benz with a chassis from AL-KO in lengths 760, 810 and 860.

Perfection – KABE Imperial

Design, quality, comfort and driving characteristics – Imperial is the best of the best. All Imperial models are built on a base from Mercedes-Benz with a specially developed AL-KO chassis, resulting in a superior driving experience, smart functions and extremely comfortable living. With our Imperial-series, we elevate motorhome-living to a completely new level. Imperial is available in lengths 810, 860 and 910.

EXTERIOR KABE design

Design, safety and quality are the trademarks of every KABE. You will immediately recognize our up-to-date, yet classic motorhome on the road. And as you get to know your KABE, with all its thoughtful details and conveniences, you will fully realize the value of our elaborate design.

It's all about the details.

KABEs unique exterior makes a statement anywhere. Every model is equipped with our unique Innovation Design exterior with bold graphics printed directly on the body with a high UV resistance to protect the colour for many years.

Extra large windows provide a bright and airy interior.

All KABE Crown and Imperial models feature LED-headlights, for a safer drive (also available as an option with the Novum and Royal Design Package).

In 2020, we increased the width of the living area entry door in every model. Our new Novum (except for 750T which has a Dometic door) and Royal models feature the door Hartal Evolution. In our Crown and Imperial models, the door is HartaLux with extra strong hinges, frame and handle as well as a three-point lock.

At KABE, we work hard to constantly develop and improve our motorhomes and strive to be at the forefront, or even a step ahead of the competition. To offer you, the KABE-owner, the very best – a safe and superior motorhome with an exclusive feeling both inside and out.

NEWS! In 2023, all Royal, Crown and Imperial models are updated with modern KABE-emblems.

NEWS! New side lights.

EXTERIOR / BODY:
How we build!

Unique windows with smart details

Our smooth and tinted exterior window pane protects against heat. Integrated screens and blackout shades are included. All windows, except the kitchen window, can be opened.

iWall technology provides a stable and water-proof body

The body is built according to the "sandwich principle": outer sheet, inner sheet and wall covering that absorbs any condensation. Ecoprim insulation is a moisture proof material with a 'closed cell' design. Our iWall-construction provides maximum stability and the body is absolutely water-proof. Aluminium sheets on both sides of the Ecoprim insulation significantly reduce the impact of interior and exterior temperature differences.

Plastic beams

KABE uses plastic beams with integrated air ducts in all moisture exposed parts of the body. Patent is pending for the KABE-designed plastic beams. Our plastic beams have superior insulation properties and also provide a more secure connection between the interconnected panels.

Sealed roof joints

The exterior roof overlaps the sidewalls to ensure water cannot penetrate. Zero leaks – guaranteed. KABE's unique iWall construction has an unlimited number of attachment points for installation of optional equipment. Insulation in walls and windows provide warmth in winter and cools the motorhome in the summer.

Nordic specification with additional heating package

Every Travel Master motorhome is equipped with Nordic specification, a large battery and generator as well as a heated fuel filter. Extra heating package located in the side console is connected to the floor heating system (Crown, Imperial).

Webasto combustion heater

KABE motorhomes are equipped with the Webasto combustion heater to heat the engine circuit. The Webasto timer allows you to heat the driver's cab in advance, even with the engine turned off, up to 24 hours prior to departure. With the help of a heat exchanger, Webasto can provide heat in the living areas of the motorhome as well (not in Novum Light).

INTERIOR

Make yourself at home

Life in a KABE motorhome is living with the highest comfort and quality in every detail, every day. All materials are selected with the utmost care, to live up to your expectations both in terms of aesthetics and durability. The design is current yet classic. Rest assured that your KABE will always feel modern, stylish and elegant.

KABEs interior is characterized by our exclusive, warm and modern Nordic Oak light wood laminate. Every interior detail is carefully selected to complement the Scandinavian colour palette and create a unified look. Floor and wall coverings, plexiglass, counter tops, tables and consoles are all designed in coordinating shades.

Swivel front seats with maximum space in between make all the difference for flexible use. Switch from driving to relaxing mode around the dining table in just a few seconds! KABE Crown and Imperial feature exclusive seats with integrated seat belts in the driver's cab.

Every KABE motorhome model is equipped with a sound insulating, fitted ceiling covering to eliminate both inside and outside noise.

Interior lighting contributes to the atmosphere in your home and is equally important in your motorhome. Last year, we updated the lighting in the entry area. As soon as you unlock the door, ceiling light, inside door handle light and lights at the inside steps are turned on – a function that adds to your well-being and security. Other details worth mentioning are indirect lighting under overhead cabinets, wardrobe lights, cargo area lights and dimmer for the front ceiling light.

Electric privacy screen for the front windshield is standard in our Crown and Imperial-models – it couldn't be simpler to create that cosy and private motorhome-feeling when dusk approaches.

NEWS! From 2023, all Mercedes front seats feature KABE-designed, permanent upholstery – even Van, Novum and Royal!

NEWS! Collapsible 5th passenger seat for forward facing seat is available as an option.

We fill our motorhomes to the max with extra equipment and lots of practical features and solutions to provide you with a comfortable yet functional lifestyle. Many are included already in the base version, when you choose a KABE.

Read more on pages 24-25.

A KABE motorhome is an investment in quality of life, we leave nothing to chance.

KITCHEN

With everything you need

Every KABE kitchen is well-equipped with lots of storage and a carefully thought through design. Fine dining requires a convenient space to prepare. Our smart solutions provide extra counter space when it's most needed. Our kitchen drawers feature soft-close mechanism and central locks. You will find many exclusive details, such as the rounded kitchen sink with its stylish tap, pull out cutting board in carefully selected beech wood and a functional drawer for your cutlery. Naturally, you can sort your waste with separate bins, just like at home.

Kitchen counter with a 3-burner gas stove is standard in all KABE motorhomes, except for KABE Van which is equipped with a 2-burner stove. The 3-burner stove has a split lid that adds a smart, extra space. In addition, our sink cover increases your overall counter space. The stylish, bronze coloured TecTower refrigerator and freezer is included in our Crown and Imperial models. All in all, a kitchen that invites you to complete dining pleasure, regardless of how many people gather at the table.

Recessed drawers and cabinet doors are standard. In Novum, Royal and Crown you will find the kitchen counter Velvet Grey, in faux stone. Our KABE Van is equipped with the kitchen counter Diamond White. All surfaces are both durable and easy to keep clean.

Our Imperial kitchen (above) is not your ordinary motorhome-kitchen! We've taken the concept of premium one step further, and created a kitchen for the true connoisseurs. KABE Imperial is equipped with the luxurious kitchen counter Corian Matterhorn and the models feature TecTower with a built-in oven. In our i910-models, you will find a practical, adjustable shelf with space for a coffee maker.

NEWS! Introducing Neonflex – a thinner LED silicon profile with new mouldings on both sides of the refrigerator.

LIVING AREA

With room for everyone

The living room is the natural place to relax and enjoy your company. A comfortable seating area is important for everyone's well-being. Our sofas are oversized and spacious with plush and ergonomic seat cushions. You will always be comfortably seated!

From our unique and carefully developed collections, you can choose the upholstery that suits you and your family best. See page 20. In KABE Imperial, leather deluxe upholstery is included.

In Novum, Royal, Crown and Imperial our seat cushions are made with first-rate Premium Foam-padding. All cushions have anti-slip fabric on the underside to make sure that they always stay in place (not in Van).

The seating area in a motorhome requires a design that's different from your sofa at home. To make sure it is a comfortable and safe place on the road, we have developed passenger seats with slide-out function (not in Novum Light). You can easily adjust the seat and back rest. Our fold-down arm rest is standard in Novum Heavy, Royal, Crown and Imperial, and provides an enjoyable ride for the passengers as well.

KABE's unique solution for the dinette sofa is a vital safety measure which prevents the passenger from sliding under the seat belt in case of a collision.

The clean lines in our high-gloss table, complemented with details such as rounded sofa corners and indirect lighting under the overhead cabinets provide a cosy feeling. Smart storage solutions in our overhead cabinets with a shelf makes it easy to stay organized.

A wireless cell-phone charger is included in all models(except Royal x780LB/LGB).

NEWS! New belt buckles (for 3rd and 4th passenger seats) with Isofix standard and an adjustable head rest ensures comfort on the road.

NEWS! KABE Royal x780 LXL can be constructed with the option "face-to-face" sofa.

BEDROOM

A place to relax

We all know what a difference a good night's sleep makes. Comfortable beds with supportive mattresses are always included with your KABE. In many other brands, this is an option with an additional cost. You deserve the best!

In KABE you can choose the floor plan that works best for your family. No matter which solution you choose, our beds are top quality with thick spring mattresses and fitted bed slats. In our QB-models, the queen bed is raised with clever storage in the drawers at the base of the bed.

If you choose a semi-integrated model with Crossover design, extra bed space is included in the retractable loft bed above the dinette area (not in Novum Light, option for Novum Heavy). In all our integrated models, you will find a retractable double bed at the front of the motorhome.

Matching bedspreads are always included in your KABE.

Not only is the bed a place to sleep, you may want to curl up and read a book or a magazine for a few moments of downtime. To make it extra comfortable, our headboard is covered in soft, padded faux suede with a printed 3D pattern that adds to the up-to-date and cosy look.

The bed frame in aluminium is extra sturdy and stable (standard in Royal, Crown and Imperial). Electric adjustable bed is standard in Imperial and available as an option in Royal and Crown.

To provide good rest and relaxing mornings, we include many fine details such as soft lighting by your bed, black-out shades and sound-insulated walls and ceilings.

Night lights or not? When you want to turn on the lights, the light switch is positioned within reach – right by your bed.

Our bedrooms are equipped with roomy wardrobes and overhead cabinets to fit everything your family needs on the trip.

NEWS! In Van, Novum, Royal and Crown you will find new chrome reading lights. Our Imperial models are updated with reading lights in modern black-chrome. Some models feature new DuoSpot reading light with three controls. A smart new touch-function light switch is standard in all models.

BATHROOM

A real bathroom on the road

For most, a shower and toilet are key to a convenient and comfortable motorhome-life. Do you prefer a layout with a large bathroom and shower? Or would you rather have a separate shower and wc? In the latter version, the bedroom is divided from the living area when both doors are open which results in a private area to get ready in the morning. We offer many flexible alternatives so that you can choose the solution that suits your family best.

We want you to feel right at home.

Our characteristic, well thought-out details and the clean and stylish design throughout your motorhome are naturally included in the bathroom as well. Light, whitewashed Nordic Oak interior with a modern bathroom counter in a cement-look, exclusive hardware such as handles and hangers designed with finesse and a lock for the bathroom door complete your KABE bathroom.

In all KABE models, a swivel flush toilet with exterior emptying is included. In the Imperial-series we raise the level a bit more with a ceramic toilet bowl. The combustion toilet Cinderella is available as an option in specific floor plans (not in Novum). Towel dryer is an option in Royal, Crown and Imperial.

NEWS! In all T-bathrooms, as well as Royal x880 LQB, the bathroom mirror is updated with a new design and the back wall now features a stone-look to match the bathroom counter.

NEWS! Neonflex – is a new thinner LED silicon profile with updated mouldings that you will find in our T-bathrooms and in Royal x880 LQB.

STYLISH AND COMFORTABLE

2023 upholstery collection

It is the details that create the cosy and inviting KABE-feeling. In addition to sitting and sleeping comfortably, we think it is equally important to offer textiles and upholstery that live up to the design and durability expectations of modern motorhome-families.

Nashville, Glendale, Charleston and Hampton are updated with fresh new curtains!

FABRIC

NASHVILLE (brown)
Novum, Royal, Crown, Imperial

AUSTIN (light grey)
Novum, Royal, Crown, Imperial

GLENDALE (black)
Novum, Royal, Crown, Imperial

LEATHER

HOLLYWOOD (dark grey)
Novum, Royal, Crown (surcharge)
Imperial (standard)

CHARLESTON (beige)
Novum, Royal, Crown (surcharge)
Imperial (standard)

HAMPTON (black)
Novum, Royal, Crown (surcharge)
Imperial (standard)

In Imperial, leather upholstery is included, and it is an option for Novum, Royal and Crown. Our new belt buckles with standard Isofix and the new adjustable head rest guarantees the most comfortable drive possible.

MADE IN SWEDEN

Swedish innovation

Life in a motorhome should be convenient and worry free. We go all the way – and then some – in our quest to fill our models with as many smart solutions, functions and conveniences as possible. There is a thought behind every detail, to provide you with the very best.

Behind the stylish and elegant exterior, many quality features exist. You will find unique construction and advanced technical solutions. Already in 2021, we improved our showers with a larger and roomier version. We also created more space in the dining area with our rounded dinette sofa corners. When you are not cooking, softer kitchen lighting is more desirable and it can be adjusted from the Smart D control panel. All the small details that you may not immediately recognise when you compare KABE to other brands, that are included to make every-day life in your motorhome easier.

Our goal is to provide a motorhome experience that is as relaxing and comfortable as possible. After all, it is a mobile home that must travel safely, securely and eco-friendly on the roads. That's why many of the "extras" are simply included in our motorhomes.

Would you like to find out more? See pages 24-25.

INTERIOR: How we build!

Best seating comfort in the market with premium upholstery

Ergonomically designed sofas with durable, recycled Premium Foam cushions. The sofa's passenger seats are adjustable with slide-out function (not in Novum Light). Extremely durable, premium quality upholstery throughout and six collections to choose from. It is possible to combine curtain sets with upholstery options.

Superior bed comfort

Fitted bed slats support your body in bed. Our beds include a spring mattress with a thick top pad, for a good night's sleep. For extra comfort and reading in bed, our beds are adjustable (not in Van). The beds have a fold-up function with soft-close for more efficient cleaning.

Soft, light reflecting and insulating ceiling

KABE is the only manufacturer to feature an exclusive 'soft ceiling' design, with better acoustics inside the motorhome. Our 'soft ceiling' absorbs sound and improves the ceiling's insulation properties.

Bathroom with a shower

Our different models include shower stalls, waterproof wall covering, overhead showers and foldout or fixed shower enclosures. Many floor plans include a walk-in shower and lock for the bathroom door.

Well-equipped kitchen

Two speed, built-in kitchen fan with lighting and removable grease filter for easy cleaning. Stove with electric ignition. AES fully automatic refrigerator ventilation system. Tec-Tower refrigerator in all integrated models.

Lots of lighting throughout

Light fixtures with built-in spotlights. Indirect lighting above overhead cabinets. Night light with the light switch located by the bed. Interior light switch for exterior lights. Wardrobe and bedside drawer lights.

KABE-quality interior and carpentry

Interior and furniture construction from KABE's own carpentry.

Drying cabinet

Drying cabinet that includes our in-house designed drip tray for drying shoes and a special convactor as well as an adjustable roof valve for maximum heat circulation.

SMART COMFORT

Year round

The Scandinavian climate is extremely challenging – we know. It can vary from warm and dry summer, to wet and breezy autumn and really cold winter with lots of snow. But you can be sure that our motorhomes are built to manage both road conditions, wind and temperature changes without a problem. Our technical innovations along with our unique heating and ventilation solution (Smart Climate System), make your KABE the best year-round vehicle on the market.

Our goal is to make your winter vacation as comfortable as your summer time off. Insulation, windows, walls, heating and ventilation are all developed to meet nature's high demands, regardless of season. Every KABE motorhome includes a number of smart heating systems. Heating convectors create comfortable heat zones in both vehicle and living areas, heat exchanger (not in Novum Light) and possibility to preheat the driver's cab when the engine is switched off up to 24 hours before departure. These are just a few examples.

Alde zone heating is standard in our Imperial models. With this system you can control the heat in two separate zones, in the rear as well as in the front of the motorhome. The bathroom is always pleasantly heated on the return loop.

In Crown and Imperial we offer both heated and cooling front seats as an option. When it is warm out, fans are activated in the seat to cool you down for extra comfort during your trip.

With more than 60 years experience and continued product development, we can proudly say that every KABE motorhome lives up to the toughest requirements, and more.

Would you like to find out more? See pages 28-31!

KABE Motorhome heating systems

HEATING AND VENTILATION: How we think!

SMART -CLIMATE+ SYSTEM

Intelligent heating system

Attention to details in all components translates to superior satisfaction and comfort. The following is always included, in every KABE: ALDE Compact boiler, AGS II or AGS II Pro waterborne under floor heating, tightly fitted convectors, optimised ventilation system, interior adapted for maximum air circulation and iWall construction.

Central heating

ALDE Compact 3030 boiler with a touchscreen display and 3kW power elements, operated with LPG and resulting in max 5,5kW (5500W). The heating system has a 12V circulation pump, integrated water heater and separate expansion vessel. A cover is placed around the LPG unit for the most efficient hot water effect.

Superior heating and comfort

Developed in-house and patent pending, KABEs automatic waterborne under floor heating system, AGS II, features four loops that provide more even heat distribution. The heat is circulated in aluminium pipes reaching all the way to the entry door, kitchen cabinets and bathroom. Heating plates distribute the heat evenly across the entire floor.

AGS II Pro

With AGS II Pro you can turn the under floor heating on separately. A shunt valve regulates the temperature of the water circulating in the floor. Fresh and waste water tanks are insulated and heated.

Integrated heating system

The floor heating system is connected to the convector system – circulating the air throughout the motorhome when the heat is turned on. The system is powered by both LPG and electric. KABE is constructed with extra wide convectors under all windows. Convectors between the driver's cab and living area create a heat barrier between the two areas.

Inner sheet in walls

KABEs sandwich-construction consists of an outer sheet, ecoprime insulation, inner sheet and wall covering. The heat from the radiators advance up along the walls. The inner sheet in the wall distributes the heat evenly across the entire wall, whereas ply-wood walls, for example, do not conduct any heat at all. Floor heating is distributed via heating plates in the floor.

Ventilation in walls and floors

KABE is the only manufacturer to feature a ventilated wall covering that lets the warm air through that is distributed up along the walls. Low level condensation near the floor is captured by the ventilated carpet, positioned along the outer edges, and dries up when you turn on the heat. In addition, KABEs wall covering has a sound-proofing effect.

Sealed windows

Energy efficient windows with a polyurethane frame that is sealed against double pane windows provide maximum insulation. The window frames are insulated with built-in ventilation. Entry door with soft-close function and a window. Screen door is included.

HEATING AND VENTILATION: How we think!

Balanced heat distribution

KABEs motorhomes are built for optimum heat distribution. Our design allows the warm air to pass freely from the floor, under beds and sofas, and up to the ceiling through our ventilated overhead cabinets.

Optimal air circulation

Our interior design is adapted to provide optimal air circulation throughout the motorhome, even behind cabinets and sofas. The distance between sofas and beds as well as the angle of the sofa backrest is carefully calculated, ensuring your KABE has the best and most evenly distributed heat possible in the living area as well as other spaces.

Angled cable trays

Maximum heat is absorbed from the convector and accelerates the warm air past the windows. Our unique cable trays are angled to allow the air to flow freely past the windows. The electrical wiring is hidden in the cable trays above the heating convectors.

Free airflow

Our overhead cabinets have built-in air ducts, to let warm air pass freely by the joint between the wall and ceiling and advance it towards the middle of the motorhome. A partition in the outer edge of the cabinets, keeps the channel open even when the cabinets are filled.

Ventilated sofas and beds

Sofa back rest and cable trays are angled to accelerate the airflow past the windows. The sofa back rest and the air space by the beds are heated when warm air is distributed along the wall.

Load monitor / power monitor

The boiler's power consumption is automatically reduced during particularly heavy loads, for example when several electrical appliances are running at the same time.

Superior heating systems

With our heat exchanger, you can easily conduct heat from the engine to the living area during your trip. This provides extra heat on really cold days.

Additional heating features

All integrated motorhomes feature heated double floors, which results in heated cargo space and better heat in the living area. Heat convectors are located under the dashboard, by the console and entry steps. Double pane windows in doors and driver's cab side windows.

SAFETY

KABE + Mercedes-Benz + AL-KO

We have great respect for the challenges you face on the Scandinavian roads. A few examples are wet, slippery roads and rapid change in temperature. We devote a lot of time and many resources to keep you safe on the road. When you invest in a KABE, we deliver a motorhome that is built in one of Europe's most modern motorhome factories, and developed for an ultimate driving experience that is both secure and comfortable.

It is a well-known fact that KABE will never compromise on quality. And now we take our efforts even one step further, to achieve the highest standard possible and superior driving characteristics regardless of climate and road conditions.

In combination with a motorhome base from Mercedes-Benz, your KABE is a vehicle focused on the utmost safety and industry cutting edge technology. Together with a tailor-made chassis from AL-KO, KABE currently offers "time-tested" motorhomes with a driver feel similar to that of a passenger car.

In addition, we've made several updates and improved actions to further increase your safety in the event of a collision.

Your safety on the road

We have developed our passive safety systems (collision safety) and equipped our motorhomes with additional active safety systems.

PASSIVE SAFETY SYSTEMS (Collision Safety)

Stable body: Vehicle and living sections are joined with a steel structure. The walls and the motorhome front are built with the sandwich-principle to maximise rigidity. The A-post is made in one piece solid construction. The steel structure is joined to the driver's cab with solid steel plates, which provides a strong attachment to the vehicle section. The inner walls are joined to the outer walls with an F-shaped aluminium profile.

Unique construction in our dinette sofa that prevents the passenger from sliding out from under the seat belt: The dinette sofa is equipped with a metal frame that is connected to the seat cushion, preventing it from sliding out in the event of a collision.

Steel frames inside the dinette sofa: The passenger seats in the dinette sofa, feature a reinforced metal frame inside the sofa box, preventing it to collapse in the event of a collision. The metal frame also secures the water tank. The sofa itself is integrated with the water tank enclosure, which is securely anchored to the floor to minimize the risk of the sofa breaking or coming loose in the event of a collision.

Collision proof refrigerator with steel beam (applies to certain models depending on the location of the refrigerator).

Steel frame around the battery: A new, stable metal holder keeps the battery in the living area securely in place even in the event of a collision.

Foldaway table top: The table can be folded down (or removed in Van) to create more space between the driver's front seat and the passengers in the dinette sofa and to provide the passengers with a much safer trip.

ACTIVE SAFETY SYSTEMS (Accident Prevention Systems)

Today, all of our model-series are built on a base from Mercedes-Benz, with elaborate comfort and superior safety. Nothing is left to chance and a number of technical functions provide you with a secure and first-rate quality experience on the road.

Every motorhome from KABE include Heavy-Duty motor, automatic brakes, traffic light assistant, crosswind assistant (not for tandem models) attention assist and rain sensor.

In Novum, Royal and Van, Lane Departure Warning is included.

With your purchase of Mercedes Comfort Package (available as an option for Novum and Royal), road sign assistant, high beam assistant, electric parking brake and Thermotronic in the vehicle section are also included.

KABE Van includes parking sensors and collision avoidance sensors.

Our integrated tandem axle vehicles have a total standard weight of 5500 kg.

DISTRONIC is included in our Imperial models and available as an option for Novum, Royal and Crown.

Find out more on pages 34-35.

SAFETY

KABE + Mercedes-Benz + AL-KO

You will find Mercedes unique 9G-tronic in all our KABE motorhomes. 9G-tronic is the very latest, fully integrated automatic transmission with 9 gears that is adapted to a motorhome's specific requirements in terms of reduced consumption and emissions.

The very latest multimedia system from Mercedes is included – a 10.25 inch MBUX touchscreen with a rear view camera.

An elegant front exterior, luxurious driver's cab and a wide range of technical and connected functions are included.

MBUX multimedia system with a 10.25 inch touchscreen has everything you need as far as infotainment, navigation and communication. It is operated on the high resolution touchscreen or the touch controls on the multifunction steering wheel – very innovative!

- Intelligent voice control that continuously improves with the help of AI.
- 3D graphics.
- Dynamic navigation can help you avoid traffic and shorten driving time.
- Integration of smart phones via Android Auto, Apple CarPlay or Mirrorlink as well as Bluetooth with hands free function makes it possible to have a phone conversation while you are driving without distraction.
- Real-time traffic information.

All KABE model series are built on the strong combination of Mercedes-Benz and AL-KO, with a suspension and shock absorption that is developed and perfected by AL-KO together with Mercedes-Benz.

The chassis are prepared for the addition of HY4 hydraulic support legs (standard in Imperial) tow bar, ClickFix mechanical support legs and load carriers.

AL-KO

Electric adjustable and heated side mirrors.

Leather multifunction steering wheel with MBUX touch controller. DISTRONIC distance control. The active distance assistant DISTRONIC can maintain the distance, set by the driver, to the vehicle in front, to relieve the driver on the highway or in stop-and-go traffic (standard in Imperial and option in Novum, Royal and Crown).

Keyless Start.

CLIMATE CHAMBER
The motorhomes are carefully tested in our climate chamber.

-35 TO +55 DEGREES
Our motorhomes are tested in temperatures from -35 up to +55 degrees.

QUALITY
With the help of thermal cameras, we ensure that the construction reaches exactly the quality we strive for.

COMPLETELY WATER PROOF
Brand new technology is used to check that the motorhomes are absolutely water proof.

OPTIMISED WEIGHT DISTRIBUTION
Scales are used to balance and optimise the weight distribution between axles.

TOWING CAPACITY
Measuring equipment is used to check towing capacity.

DURABILITY
Pressure is used to test the strength of the vehicles.

AIRFLOWS
Airflows are carefully checked with smoke.

VENTILATION
Correct ventilation is vital and it is carefully tested.

GAS SYSTEM
The gas system is pressure tested.

ELECTRICAL SYSTEM
Electrical systems and other important functions are carefully checked before our motorhomes can leave the factory.

DRIVING DURABILITY TEST
Durability tests are performed and simulated with equipment corresponding to 10,000 km of normal driving.

RAIN CHAMBER
In the rain chamber, the motorhomes are tested with a high pressure sprayer.

BODY ENDURANCE TEST
Endurance tests are performed on every part of the body.

MANUFACTURING
We use state-of-the-art technology to manufacture our motorhomes.

CAREFULLY TESTED Vital solutions

At KABE, we leave nothing to chance. You will find stylish and high quality design, everywhere you look. We perform thorough tests of every little detail and function. For example, we test every motorhome in our climate chamber, to make sure they can withstand temperature differences of up to 90 degrees. The latest technology is used to make sure your caravan is absolutely water proof. We also test endurance, durability, air flow, electrical systems and much more. We accept only top marks on every test. It's a matter of KABE quality.

TECHNOLOGY

KABE Smart D

European Innovation Award

KABE SMART D control panel – **winner of European Innovation Award** – monitors your motorhome. With KABE Smart D, you can manage many functions. The panel is designed with a focus on user friendliness and features a touchscreen display that is easy to understand. It shows fresh water level, waste water level and battery voltage. You can control lighting, AC, boiler and temperature as well as the electrically retractable loft bed and certain other options. In addition, the system includes several alarm functions and will remind you to make a service appointment or let you know if a fuse has tripped. All conveniently displayed on one screen. Standard in all KABE models.

Which language do you prefer to navigate your KABE Smart D? Just like your smart phone, you can simply select the language.

KABE Smart D Remote app enables you to manage the control panel remotely, from anywhere. You may start the AC on your way home from the beach or adjust the heat and turn on welcoming lights before your last run on the ski slopes! KABE Smart D Remote is built together with a 4G router with an internal antenna and a mobile modem (external antenna is available as an option). As well as managing the heat, lighting and keep track of the motorhome's functions and alarms via your cell phone, you also have access to a wireless internet connection on the road. KABE Smart D Remote* is available as an option in all models.

KABE Smart Level – for an even simpler KABE-life! Starting in 2023, we are expanding our Smart D panel with KABE Smart Level which includes three useful functions. Smart Level tracks your LPG-level (with use of one LPG- bottle, not for composite bottles), tire air pressure and the inclination of the motorhome. The panel displays your LPG-level. No need to worry about unexpectedly running out of LPG during your trip. It can be difficult to find a refill station when you are travelling abroad or in the winter time. The tire air pressure sensor helps to ensure that your tires have the right amount of air pressure for a safe and fuel-efficient drive. Additionally, a level indicator is included with KABE Smart Level. When your motorhome is parked, the display shows your vehicles inclination. An important factor for a pleasant and functional stay. With KABE Smart Level, we improve your quality KABE-life even a bit more!

KABE Smart Level is included in our Imperial-models and available as an option for Novum, Royal and Crown.

* With your purchase of KABE Smart D Remote, a 36 month subscription is included. After 36 months, you will pay a yearly fee for the use of the app. A separate mobile data subscription is needed as well.

The home screen displays lighting controls and digital sliders for dimmers, inside and outside temperature as well as time.

Current status information about fresh water level, waste water level and battery voltage is clearly displayed.

All information and controls for heating are displayed on a separate page. You can easily adjust the heat with digital sliders.

TECHNOLOGY: What we do!

PREMIUM SOUND WITH DAB. KABE premium sound system with DAB is standard in Imperial.

WIRELESS CHARGER. A wireless cell phone charger is standard in all models except for Royal x780 LB/LGB.

WIRELESS ROUTER. To maximize your media options, a router for wireless internet connection is standard in all models. An external antenna for the router is available as an option.

KABE Smart D intelligent electric control unit

User friendly electric panel. The electrical system detects battery power and is automatically charged when needed. The system tracks water levels, temperature and battery voltage.

Drivers Cabin Heating System (Crown, Imperial)

Heat exchanger connects the heat from the engine to the living area. Waterborne floor heating mat in driver's cabin. Built-in convectors inside door step (vehicle section). Pleated blackout drapes in front and side windows. Convector between vehicle section and living area form a heat barrier. Extra heating package in side console is connected to the under floor heating system.

Powerful generator and battery

Our extra powerful electrical system increases battery life, even during low outdoor temperatures.

Electronic TV antenna

Electronic TV antenna for both analog and digital reception. Exterior TV connection, cable TV and 12 / 230 V. TV antenna socket in three locations: media console, bedroom area and electric box. Alarm indicates if the antenna is raised at start up. Media cabinet with fold-out TV wall mount included in most of our models.

Safe and secure

Safety equipment included in all KABE motorhomes: air bag, ABS brakes and three-point seat belts in both drivers cab and living area passenger seats. Leak indicator for manual control of the gas system. Hose break valve allows the gas to be on while driving. Fire alarm located in the bedroom area. Ground fault circuit breaker. Crash sensor for the gas system.

Prepared for support legs and tow bar

All KABE motorhomes are constructed with AL-KO framework extension and can easily be equipped with support legs and a tow bar.

Additional equipment

The electric step is automatically retracted when you start the motorhome. Remote control central locks in the driver's cab. Living area entry door connected to central locking. Vehicle section AC. Alarm indicates if the 230 cable is connected when you start the engine. USB outlets.

...and even more equipment

(Standard in Imperial, some features are optional in other models)

- Living area AC
- Central lock exterior access doors
- Inverter
- Corian Matterhorn kitchen counter
- Premium Sound System
- Leather upholstery
- Solar panel
- Unique exterior design

OWNERSHIP

Stress free and secure

10 reasons to choose KABE:

YEAR-ROUND-COMFORT

KABE motorhomes are designed for the Scandinavian climate, to keep you equally comfortable in the middle of winter and on warm summer days. When it comes to insulation, ventilation and heating – we go all the way. For maximum stability and complete moisture control, the body is built with KABE's own iWall system. Every model features the Alde 3030 boiler and waterborne under floor heating is standard. Many of our important year-round functions are built into the design and do not attract attention when you first enter the motorhome, but you will notice the difference right away when you start using your KABE.

QUALITY

Our goal is to deliver superior quality and design, in every detail. That's always been our focus. We develop and test new solutions in our own state-of-the-art facilities in Tenhult, Sweden and every KABE is built here. It is one of Europe's most modern motorhome factories, with skilled employees and electricians as well as our own joinery producing interior fittings. And our subcontractors are among Europe's leaders in every category.

RESALE VALUE

You can be sure KABE delivers market leading quality in every model and price segment – quality that endures. We work constantly to improve our motorhomes, with the goal to always deliver a vehicle that meets your and the next owner's requirements. Rest assured that your KABE will maintain a good resale value.

TECHNOLOGY

Your new KABE always includes cutting edge technology and it is one of the most well-equipped motorhomes in the market. At KABE, we think ahead and put lots of time and effort into preparing for future challenges with new solutions and technology development. In the past few years, we have received several prestigious awards for our innovations, e.g. in ventilation and heat recovery. We do everything possible for an extremely comfortable experience on the road.

DESIGN

Our modern and spacious interior in light colours and materials, is truly Scandinavian design at its best. Recessed cabinet doors, rounded corners and ergonomic seat cushions are examples of details that create our special KABE experience. It's the perfect balance between design and function, inside as well as outside. The exterior with carefully developed features and elegant lines give each KABE its distinctive character.

FUNCTIONALITY

With more than 60 years' of experience, KABE develops and builds motorhomes for active, year-round use. You will find many smart solutions for a KABE lifestyle that is as convenient and relaxing as possible. Some examples are our practical pull-out ski box with lighting, central lock for lower kitchen cabinet doors and drawers and USB-outlets placed exactly where you need them!

CLIMATE AND ENVIRONMENT

From material selection and production technology to energy efficiency and emission levels – environmental issues are of the highest priority and we are committed all the way. We make great efforts to lead the way to an increasingly eco-friendly motorhome industry. Naturally, we support the UN's global goals of sustainable development and better working conditions, increased diversity, gender equality, as well as maintaining a high level of business ethics.

SAFETY

When you buy a KABE you invest in safety. We want you to feel secure in your investment and fully enjoy life in your motorhome. Our dealers include a 7-year warranty on water infiltration with all new models. Your safety on the road is extremely important, and our motorhomes are equipped with many active safety systems. Your KABE includes many carefully developed passive safety systems to protect you in an accident. A few examples are stable body and robust construction as well as steel frames around batteries and water tanks to prevent them from moving in a collision.

AUTHORIZED DEALERS

KABE has a wide network of authorised dealers and service stations, not only throughout Scandinavia, but in several European countries as well. They provide expert advice and help you with financing and insurance for your KABE. And once you are on the road, we have more than 100 authorised service stations in northern Europe. You will always find professional help, should you need it. Many have worked with us for decades. You are in safe hands!

OPTIONS

There is a KABE for everyone. All you have to do, is figure out which size, floor plan, equipment and price level is right for you and your family. When you find your favourite model, you can select your optimal floor plan with KABE's Flexline System. There are many options and great flexibility. With our online product configuration system, building your KABE is easy. Choose "Build your KABE" on our home page www.kabe.se/en, or visit one of our dealers.

Choosing a KABE is easy

Create your dream-KABE in peace and quiet, on your computer. You can easily view all available options and possibilities in our flexible configuration tool at kabe.se/en. Choose everything from model to floor plan and details such as upholstery and optional equipment. A summary of your motorhome will be presented, including price and contact information for the nearest dealer.

It could not be easier!

There is always a perfect KABE

We have developed five model series, each with unique features, to suit the different needs of our KABE owners. Whether you choose a KABE van, a slightly smaller motorhome or a large integrated model, you can be sure it includes year-round comfort, excellent quality, safety and lots of smart solutions. KABE motorhomes are among the most well-equipped in every price range.

KABE Van

KABE Van is the perfect choice for the adventurous soul. A flexible, furnished van with the same quality heating and ventilation, interior and year-round features as our other motorhomes. The living section is built in Sweden, on a Mercedes-Benz Sprinter base and it is 6,90 metres long.

Page 56

KABE Crown

Integrated KABE Crown is built on a base from Mercedes-Benz with an AL-KO chassis, and includes all the characteristic features of the premium brand. High level design and carefully considered, intelligent functionality throughout. Front wheel drive and automatic transmission are standard. KABE Crown is available in the lengths 760, 810 and 860.

Page 78

KABE Novum – New 2023!

KABE Novum is our biggest and at the same time smallest news in 2023! A light 3,5 ton car, built on a Mercedes-Benz Sprinter-base with a chassis from AL-KO in 750 length. As an option, the new model is also available with the weight 4,5 tons, and space for a retractable loft bed above the dinette area (option in Novum Heavy). KABE Novum, includes KABEs top quality throughout and many standard features are included (that are often optional from other brands).

Page 64

KABE Imperial

With all the features of KABE Crown, and more. Imperial is our extra spacious, luxurious front runner. All KABE Imperial models are built on a base from Mercedes-Benz with a specially adapted AL-KO chassis. The motorhome is surprisingly similar to a passenger car, both as far as comfort and safety, and it is maxed out with smart functions and superior design. All models are fully integrated and available in the lengths 810, 860 and 910.

Page 86

KABE Royal

When you want nothing but the best equipment and comfort, KABE Royal is the right choice. Our Royal-series is built on a Mercedes-Benz Sprinter base with an AL-KO chassis in two semi-integrated models: Royal Crossover in the lengths 780 and 880. Both include an electrically retractable loft bed and features that are at the forefront of technology. King Size living area with a width of 2,50 meters completes this motorhome!

Page 70

Your personal floor plan

Selecting the right floor plan for your motorhome, is as important as when you buy a permanent home. We all have different needs and wish-lists. That's why we offer a number of floor plan solutions so that you can tailor your motorhome to your personal requirements.

Choose your floor plan

KABE Van

KABE Van is the perfect choice for a carefree and relaxed lifestyle with a focus on adventure. Just like our other motorhomes, the furnished van is built with KABEs superior quality. KABE Van is a smart and carefully designed year-round vehicle built on a base from Mercedes-Benz Sprinter with a raised ceiling and a total length of 6,90 metres. KABE Van features rear wheel drive (four wheel drive is available as an option) and Mercedes 4-cylinder 170 HP diesel engine with Euro-VI emission standard. For increased security and safety, the rear view camera image is displayed on the touchscreen.

KABE Van is delivered with a stylish white exterior, Camper-White, with KABEs unique 3D-look decal graphics. As an option, you can order your KABE Van in elegant blue-grey metallic, Tenorite-Grey, which also features our 3D-look decal graphics.

KABE Van standard equipment:

- ▶ Compressor refrigerator
- ▶ Kitchen counter and refrigerator built with a crash frame
- ▶ Award-winning Smart D electrical system

See our options on pages 62-63.

A grown-up van with unique year-round features

With its elegant exterior and luxurious interior – KABE Van is a compact and optimised vehicle with superior quality that is surprisingly similar to a personal car both as far as comfort and safety. KABE Van is built for year-round use.

Most comfortable heating

The body floor space is insulated with 10 mm plastic cells to insulate the space between body and living area floors. In that area, for example water tanks and water pipes are located and well protected from freezing. In addition, the living area floor is insulated with 25 mm Ecoprim insulation and equipped with our waterborne under floor heating which provides extremely comfortable temperatures in the living area. Our waterborne under floor heating system, AGS II Pro, with four loops provides very even heat. The heat circulates in aluminium pipes that reach all the way to the entry door, kitchen area and bathroom. Heating plates distribute the heat evenly across the entire floor.

Insulation in every wall space

Insulation is sprayed into ceilings, walls, beams and every single space behind the interior walls. This is a brand new technique, where small glue-coated beads are injected and cured into a durable and solid insulation with a thickness of 35-50 mm. This technology minimizes the risk of cold zones.

Optimised insulation combined with ALDE heating system and excellent ventilation result in KABE's unique heat distribution throughout the living area.

Our interior is adapted to provide optimal air circulation in the entire van, even behind cabinets and sofas.

A waterborne convector loop surrounds the entire living area in combination with three thermal barriers to prevent cold drafts.

The thermal barrier consist of convectors located under the floor, between the driver's cab and living area, entry and living area as well as rear doors and living area.

Living area windows with insulated frames.

2023 upholstery: BERKELEY (grey)

LOUISVILLE (beige)

KABE Van 2023

The vehicles light Nordic Oak interior together with stylish matte white cabinets and mouldings create a feeling of space inside. The interior is manufactured in our own carpentry and includes a number of smart and practical storage solutions. The table is finished in Diamond White.

Two single beds convert easily to a comfortable double bed. Swivel bathroom sink makes room for the shower. KABE Van is a completely flexible vehicle throughout, with maximum amount of storage on the road that easily converts to a spacious and comfortable living area when you make a stop.

The large panorama skylight provides wonderful light inside the Van. Black out shade and faux suede covered light fixture are included.

In addition to standard Camper-White, KABE Van is available in elegant grey-metallic exterior, Tenorite-Grey, as an option as of model year 2022. Both with KABE's unique 3D-look decal graphics. Our white KABE Van includes a white front bumper and white electric awning. Grey-metallic Van features a black electric awning.

Exterior lighting above the sliding door is included.

Solar panel makes it possible to add the AC option.

Twin wheels are available as an option.

We've added another tank to the wastewater tank for a total volume of 83 litres (same total volume as our freshwater tank).

- ▷ ALDE Flow for boiler ALDE 3030 Plus is available as an option

KABE Novum 2023

The interior is characterized by KABE's exclusive carpentry produced in-house. The wood laminate Nordic Oak, soft latte-coloured table tops, a coordinating grey counter top as well as light wall and floor coverings.

In new KABE Novum, a well-equipped kitchen welcomes you with plenty of storage space and a carefully considered design. Cabinet doors and drawers are recessed for a clean look and the upper cabinet doors in Nordic Oak feature a modern beige detail. The kitchen side wall is finished in matching wood laminate. The rounded kitchen sink, with its sleek single handle tap, set the tone together with our contemporary counter top in Velvet Grey. A lid that covers the sink is included, resulting in a larger cohesive work-space. All kitchen drawers are equipped with soft-close function.

You will always be comfortably seated in our Novum sofa – on your drive and during dinner or relaxing time. All seat cushions are made with Premium Foam and anti-slip covering on the underside to stay in place. Our Novum Heavy models include slide-out for belted passenger seats (not in Novum Light) and you can easily adjust both seat and back rest. You may choose from three fabric collections.

Single or double bed? Select the floor plan and bedroom solution that best suits your family needs. Our Novum-models feature a cosy faux suede covered headboard with a brand new chrome reading light. You will also find KABE's smart new touch-control light switch that lets you manage the indirect lighting, bedroom ceiling light as well as the lighting in the front living area.

A real shower is a convenience that is naturally included in all KABE Novum models. Our T-bathrooms have a new mirror design and a back wall with a concrete-look to match the bathroom counter.

Travel Master Novum 750 LXL

KABE Novum 750 LXL is loaded with all the basics for a comfortable vacation. Any time of the year. A double bed and bathroom with a shower are located in the back of the motorhome. In the L-shaped kitchen, you will find many innovative solutions and lots of space to cook!

TECHNICAL SPECIFICATION	
Interior length, living area	4680 mm
Interior width	2238 mm

KABE Royal

Luxury is the standard in our KABE Royal series. It's the perfect choice for those who want to be at the forefront of technology and are looking for a competent motorhome with a lot of user flexibility. Our Royal models with Crossover (retractable loft bed above the dinette area) are available in lengths 780 and 880. Royal is built on a base from Mercedes-Benz Sprinter and filled with smart functions for a convenient lifestyle. Carefully designed and comfortable driver and passenger environment, maximum interior space as well as excellent driving characteristics – largely due to AL-KO tailor-made low frame chassis.

CROSSOVER MODELS:

Travel Master Royal x780

Travel Master Royal x880

KABE Royal standard equipment (in addition to what's included in KABE Novum on page 65):

- ▶ 4500 kg AL-KO chassis / 5200 kg AL-KO tandem chassis
- ▶ King Size width
- ▶ Diesel engine heater
- ▶ Electric retractable loft bed above the dinette is included
- ▶ Large refrigerator and freezer

See our options and packages on pages 94-97.

KABE Royal 2023

Our interior is designed for ultimate convenience – yet it is visually pleasing! Nordic Oak laminate throughout with a light, white-washed feeling that is warm and modern. The entire interior is coordinated to these shades. You can choose from three fabric upholstery collections and leather is available as an option.

There is a sleek handle to hold onto when you step into the motorhome with built-in lighting.

A faux suede covered modern ceiling light is a nice touch!

In the drivers cab, a thermal drape that covers the lower part is included in every Royal. This year in an up-to-date grey shade.

Recessed drawers and cabinet doors, as well as a kitchen counter in contemporary faux stone are included in all Royal-models. A stylish look that will always feel right. Our 3-burner stove with a split lid, provides valuable additional space.

Sofa with an adjustable armrest makes for extra convenient travel. To ensure that you are comfortably seated during your trip, our belted passenger seats also have slide-out function. You can easily adjust both seat and backrest. For extra safety, our sofa is constructed to prevent you from sliding under the seat belt in a crash.

All our seat cushions are designed with anti-slip fabric on the underside so that they stay in place.

Spotlights provide a cosy light.

A wireless cell phone charger is included and it's located in the front of the motorhome (not in Royal x780 LB/LGB).

Our Royal-bedroom is always inviting with headboards covered in soft, padded faux suede with a printed 3D pattern. Comfortable beds with spring mattresses, thick top pads and flexible slats are always included. Several models feature an adjustable bed.

You will find extra bed space in every Royal-model. A smart, retractable loft bed is located above the dinette area (Crossover). Enjoy a good nights sleep, and in the morning the space is easily converted to make room around the breakfast table (see pages 76-77).

The bathroom counter Urban Style and the shower wall in our T-models feature a modern concrete-look with darker details.

Distronic is available as an option.

Travel Master Royal x780 LXL

x780 LXL has an inviting and open floor plan with an L-shaped kitchen. Two double beds, one in the rear and a retractable loft bed in the front, creates efficient space and provides an extra bed for two overnight guests.

TECHNICAL SPECIFICATION

- ▷ ALDE Flow for boiler ALDE 3030 Plus is available as an option

KABE Crown 2023

KABE Crown is the best of the best. A year-round motorhome with the ultimate technical solutions, comfort and design. Among many other things, our extra wide entry door, HartaLux, is worth mentioning. It provides a more comfortable entry to the living area as well as lots of additional light inside the motorhome. When you unlock the door, the lights in the entry area turn on automatically!

In the lower part of the driver's cab, a thermal drape (updated in a stylish shade of grey) is included in all Crown-models.

Our Crown models feature Nordic Oak interior, and the entire interior is adapted to the fresh and bright look. Upper kitchen and overhead cabinet doors throughout are finished with the wood laminate and a modern beige stripe. Enjoy the soft and relaxing mood lighting in the kitchen. The kitchen fan was updated with new lighting last year.

You can be sure to get a good nights sleep in your KABE Crown – just like home. The headboard is covered in a soft padded faux suede material with a printed 3D pattern, comfortable mattresses, smart storage solutions and cosy lighting as well as new chrome reading lights. All designed so that you can enjoy for many hours. Sturdy and stable bed frame in aluminium is included. Electric adjustable bed is available as an option.

In 2022, all Crown-models were updated with new cabinets under the loft bed and new lighting behind the loft bed. Faux suede covered lighting under the loft bed match our stylish ceiling light.

Updated chrome reading lights with smart USB-outlets are placed in select spots throughout the motorhome.

The skylight provides wonderful natural light inside to brighten your day. Many storage options help to keep the motorhome organized and clean.

A spacious L-shaped sofa is always included in KABE Crown! The passenger seats feature slide-out function with easily adjustable seat and back rests as well as an adjustable armrests to make your drive as comfortable as possible. Leather is available as an option. Our unique sofa construction prevents the passenger from sliding under the seat belt in a collision – safe and secure!

All of our seat cushions feature an anti-slip underside so that they always stay in place.

The deep cargo space in the motorhome's double floor space is furnished with pull-out drawers to simplify packing and storage,

All KABE Crown models feature a turn-table (where a pull-out rail is not available) in the LPG storage space, which makes it easier to handle heavy gas tanks.

With the option heated seats and cooling seats, you'll be comfortably warm in the winter and cool in the summer.

150 litre fresh water tank is standard in Crown.

Distronic is available as an option.

Electric privacy screen for the windshield is standard in Crown – creating a cosy and private motorhome couldn't be simpler.

Travel Master Crown i760 LXL

This option can fit many, four people on the road and up to six bed spaces! The rear of the motorhome features a double bed and a WC and shower. In addition, a double loft bed is located in the front and can be lowered at night time.

KABE Imperial

Our Imperial series is the definition of the premium segment of motorhomes. The highest standard on the market, in every aspect. Separate built-in oven, large and spacious bathroom, eco-package, Premium Sound System, exclusive carpentry and exquisite leather upholstery, automatic zone heating, rear view camera and navigation are just a few examples of what's included. Imperial is built on a base from Mercedes-Benz with an AL-KO chassis with rear tandem axles that offer an unbeatable stable, safe and comfortable ride. If you want the very best, KABE Imperial is the motorhome for you!

INTEGRATED MODELLER:

Travel Master Imperial i810

Travel Master Imperial i860

Travel Master Imperial i910

In addition to the standard equipment included in Novum (page 65), Royal (page 71) and Crown (page 79), our fully equipped KABE Imperial models also include:

- ▶ Living area AC
- ▶ Alde zone heating
- ▶ Central locks on several outside access doors
- ▶ Shower outlet in garage
- ▶ Hydraulic support legs
- ▶ Corian Matterhorn counter top in the kitchen
- ▶ Electric adjustable bed
- ▶ Flush toilet with a ceramic bowl
- ▶ Leather upholstery – 3 collections to choose from (fabric collections are also available)
- ▶ 2 AGM 130 Ah batteries
- ▶ Eco-package with solar panels, inverter and double batteries
- ▶ Premium Sound System with DAB
- ▶ Electric locks for the lower kitchen cabinets
- ▶ KABE Smart Level
- ▶ Distronic (adaptive cruise control – distance to the vehicle in front)

See our options on pages 94-97.

KABE Smart Level. In 2023, we expand the KABE Smart D panel with new KABE Smart Level, which includes three smart functions. Smart Level keeps track of your LPG-level, tire pressure and the inclination of your motorhome when it's parked. With KABE Smart Level, your comfortable KABE-life is even better!

KABE Imperial News!

- ▷ New KABE Kromex-technology logos and new Imperial emblems
- ▷ New sidelights
- ▷ New KABE Smart Level is controlled with your KABE Smart D system and includes LPG-level sensor (with use of an LPG-bottle, not with composite bottle), tire pressure sensor and level indicator that shows the inclination of your motorhome when parked

- ▷ Collapsible 5th forward-facing passenger seat is available as an option
- ▷ ALDE Flow for boiler ALDE 3030 Plus is available as an option

KABE Imperial 2023

Travel Master Imperial is a year-round motorhome, with all the absolute best and latest equipment in every area. Eco-package with solar panel, inverter and double batteries, a luxury kitchen, super comfortable queen-size bed and the most sophisticated waterborne under floor heating system as well as hydraulic support legs are just a few examples.

As soon as you enter, you will experience exclusive carpentry details, top notch amenities throughout and a timeless design. The entire interior is light and modern. Kitchen side wall and overhead cabinet doors in the front and rear of the motorhome are all finished with Nordic Oak laminate. Overhead cabinet doors are detailed with a beige stripe. In addition, floor and wall coverings, table tops and counter tops, plexiglass details (in the bar cabinet) – are all designed in shades that complement the Nordic Oak look.

In our exclusive Imperial kitchen, the overhead cabinet doors are finished in modern beige and the kitchen counter is called Corian Matterhorn. Tec-Tower with a separate built-in oven and an adjustable shelf with space for a coffee maker above the kitchen counter (i910) are also included.

Alde zone heating is standard in Imperial. You can adjust the heat in two separate zones with this system, in the front and rear of the motorhome. The bathroom is always pleasantly heated on the return loop.

Exclusive driver and passenger seats with KABE's own leather upholstery and an integrated seat belt are included in Imperial. Grey thermal drape that covers the lower part of the driver's cabin is also included.

You will always be comfortably seated in Imperials L-shaped leather sofa. A fold-down armrest and slide-out function enables you to adjust the seat and backrest in the passenger seats. Our unique sofa construction prevents you from sliding under the seat belt in a collision. Your safety is always number one.

Only the best is good enough and that goes for our Imperial-bathrooms too. You can choose between a large bathroom with a shower or separate shower and WC. In the latter solution, the entire bedroom area is sectioned off from the living area when both doors are open. Practical and private! The bathroom counter is called Urban Style, with a modern concrete-look that is also used on the shower walls in our T-models.

Electric adjustable bed is standard in KABE Imperial.

A wireless router is included along with a wireless charging station in the front of our Imperial models.

DISTRONIC is included in Imperial.

LOTS OF OPTIONS FOR YOUR Novum, Royal, Crown, Imperial

Add that little extra to your KABE. We know what's needed for a comfortable motorhome-life. That's why every KABE includes a generous list of standard equipment. To be honest, we offer many details that our competitors charge extra for. But we all have different needs, naturally you may choose the options that are right for you, to create the perfect solution for your family. A wide range of options are available*.

Two powerful packages are available for our Novum and Royal models: Mercedes-Benz Comfort package and a Design package! These are added in the factory prior to delivery of your motorhome. Your dealer can add additional options at a later time.

MERCEDES-BENZ COMFORT PACKAGE

Road sign assistance High beam assistance Thermotronic vehicle section Electric parking brake

DESIGN PACKAGE

Chrome radiator grill Aluminium rims Projected KABE logo in the entry LED headlights high and low beam

DESIGN PACKAGE

Chrome radiator grill Aluminium rims x780 / x880 (prices may vary) Skyview decor LED headlights high and low beam

*With the addition of options, the minimum load capacity must be considered so that it is not affected as defined in ECE 1230/2012.

ENGINE / CHASSIS

DISTRONIC / adaptive cruise control. Set the desired distance in the assistant. The active distance assistant DISTRONIC can maintain the distance to the vehicle in front, relieving the driver on the highway or in stop-and-go traffic (standard in Imperial).

AL-KO HY4 hydraulic support legs. Simply press the button on the controller to level your vehicle. To activate night mode with a slight inclination forward, just press that button. Yet another button will pull in the support legs entirely. You can also manage HY4 manually and control combinations of support leg pairs as you wish. Each leg has its own motor and the entire system is mounted on the chassis. Not inside the vehicle. HY4 is standard in Imperial, available as an option in others.

KABE Smart D Remote. KABE Smart D Remote* enables you to manage the control panel remotely, from anywhere. KABE Smart D Remote is built together with a 4G router with an internal antenna and a mobile modem (external antenna is available as an option). In addition to managing heating, lighting and keep track of the motorhome's functions and alarms via your cell phone, you also have access to a wireless internet connection on the road.

* With your purchase of KABE Smart D Remote, a 36 month subscription is included. After 36 months, you will pay a yearly fee for the use of the app.

NEW! KABE Smart Level – for an even simpler KABE-llife! (standard in Imperial)

Starting in 2023, we are expanding our Smart D panel with KABE Smart Level which includes three useful functions. Smart Level tracks your LPG-level (with use of one LPG-bottle, not for composite bottles), tire air pressure and the inclination of the motorhome. The panel displays your LPG-level. No need to worry about unexpectedly running out of LPG during your trip. It can be difficult to find a refill station when you are travelling abroad or in the winter time. The tire air pressure sensor helps to ensure that your tires have the right amount of air pressure for a safe and fuel-efficient drive. Additionally, a level indicator is included with KABE Smart Level. When your motorhome is parked, the display shows your vehicles inclination. An important factor for a pleasant and functional stay.

Storage space for all your extras

Practical tie-down anchors in the garage space help to keep everything in place.

Our large pull-out storage is perfect for all kinds of things. Option in Royal.

Do you have lots of things to bring on your trip? Choose a KABE model with a large cargo space. Our garage and QB models can accommodate bicycles, tables and chairs – everything you need for a successful holiday! Heated garage space is available as an option.

The solid cargo space, located in the double floor of our fully integrated motorhomes, makes it easy to access your luggage.

In KABEs fully integrated motorhomes, the space between the double floors is utilised in a smart way. In Travel Master i810 LQB you can access the cargo space from the garage.
