

KABE Classic 2025

KABE

New experiences with KABE Classic!

Design, safety and quality – that’s what KABE stands for. Our motorhome’s classic features are clearly recognizable on the road. And as you get to know your KABE Classic, with all its thoughtful details, you will appreciate the true value of the exquisite design.

Travel Master Classic 740 is built on the all-new Fiat Ducato chassis. With a 140 HP engine, smooth 8-speed automatic transmission and agile 740-length, the series offers excellent driving characteristics and provides a driving experience with a strong car-like feel.

KABE Classic features a stylish exterior design and unique 3D-effect decals in the classic KABE colours red and black. The driver’s cab is finished in grey and gives the motorhome a fresh exterior expression. Extra-large windows provide the brightest possible indoor environment. The wide front door, Hartal Evolution, is standard in 740 LXL and LGB (our T-model features a slimmer door from Dometic).

At KABE, we work hard on continuous development of our motorhomes. Our goal is always to be at the forefront or even a step ahead. To provide you, the KABE-owner, with the very best – a reliable motorhome that maintains the highest standard and an exclusive feel inside and out.

KABE Classic is an affordable and well-equipped model series with year-round features, modern technology and KABE’s superior quality throughout. Much of what is standard in KABE Classic, is an option from other manufacturers.

The series offers the most comfort and quality in every detail, every day. All materials are selected with great care to meet your expectations in terms of both aesthetics and durability. Swivel front seats with maximum space between them result in flexible use and transition from driving mode to relaxing around the dinner table in just a few seconds! Front seats from Fiat feature KABE’s custom upholstery design.

KABE Classic is available in three floor plans: LXL, LGB and T.

Two upholstery collections are available to choose from – Tulsa and Phoenix.

KABE will not be held liable for printing errors and typos. KABE reserves the right to change design and data without prior notice. The images in this brochure may feature optional equipment. The photos feature a prototype and may be subject to equipment changes.

- ▶ Rear-view camera

Please see our options on page 7.

TULSA (beige)

PHOENIX (black)

KABE + Fiat – with a focus on safety

KABE Classic is built to the highest standards and thoroughly tested to optimize the use and experience in all conditions and every situation. We continuously work on measures for increased safety.

The passenger seats are equipped with a reinforced metal frame inside the sofa box. The sofa itself is integrated with the water tank enclosure, which is firmly anchored to the floor. This reduces the risk of the sofa breaking or detaching from the floor in the event of a collision. The metal frame also holds the water tank securely in place. In certain models, a collision proof refrigerator with a steel beam is included. A robust metal frame keeps the living area's battery securely in place in the event of a collision.

The table can be folded forward to create more space between the driver and passenger seats, providing a safer journey for the passengers.

Three options packages are available for Travel Master Classic. Our Safety Package includes adaptive cruise control, attention assist, high beam assistant, traffic sign recognition, rain and dusk assistant, lane departure warning, intelligent speed assist and autonomous emergency braking. In addition, KABE Classic can be equipped with a Heavy Package, increasing the total weight to 4,250 kg. And finally, there is an additional Heavy Package which includes a 180 HP engine, increasing the total weight to 4,400 kg.

KABE Classic 2025

New KABE Classic is available in three familiar layouts: LXL with a double bed and the single bed options LGB and T. All three models are semi-integrated motorhomes in the 3.5-ton class and require a standard category B driver's license. The Nordic Oak wood laminate interior is bright and welcoming. This model year's new interior details, such as black handles, hooks, faucets and shower fixtures can be found in KABE Classic as well, along with a modern square sink. With KABE Smart D control panel, you can easily manage many of the motorhome's functions such as lighting and temperature. A large Thetford fridge, a comfortable L-shaped sofa, a bathroom with a shower and a spacious garage are additional features that enhance your comfort in our new KABE Classic.

The modern wood laminate Nordic Oak is the foundation for the interior and coordinates nicely with everything else. Floors, walls, laminate surfaces like tables and countertops, and plexiglass details in the bar cabinet all have complementing shades.

Each Classic feature a well-equipped kitchen with ample storage and a smart, thoughtful design. The new square sink and black faucet sets the tone along with the sleek laminate countertop and kitchen cabinets in Nordic Oak. A cover can be placed over the sink to create a larger, seamless area for cooking and preparation. All drawers feature soft-close mechanism. The kitchen side wall is also finished in Nordic Oak, creating a stylish cosy feel.

In the L-shaped sofa, you are always comfortably seated during travel or dining and socializing at your destination. All our cushions have anti-slip material on the underside to ensure that they stay in place. A vital safety measure is KABE's sofa solution with a built-in safety frame, which prevents the passenger from sliding under the seatbelt in the event of a collision.

Single or double beds? Design the motorhome's bedroom to suit your family's needs. Our Classic models have a comfy upholstered headboard with a soft material and practical reading lights above. Sound-insulated walls and ceilings ensure restful nights and refreshed mornings.

The bathroom features cabinet doors in Nordic Oak as well, and for your convenience, a real shower is a standard feature in all KABE Classic. Every model includes a swivel flush toilet with external drainage. Naturally there's a lock for the bathroom door.

Lighting plays a major role in setting the mood in a home, and it's equally important for the ambiance in your motorhome. KABE Classic includes, for example, lighting under the laminate countertop in the kitchen and lighting fixtures in the bedroom and entry areas.

KABE Smart D
With KABE Smart D control panel – **winner of the European Innovation Award** – you can manage many of the motorhome's functions. The panel is designed with user-friendliness in mind and features an easy-to-read touch-screen display. You can monitor freshwater level, wastewater level and battery voltage. You can control lighting, AC, boiler and temperature as well as certain options. The system also has several alarm functions that remind you when it's time for service or if a fuse has blown. Everything is conveniently displayed on the Smart D screen. Included with KABE Classic.

Which language do you want to navigate your KABE Smart D-panel with? You can easily select your language of choice, just like on your smart-phone.

With **KABE Smart D Remote** you can manage the control panel remotely via an app from wherever you are. For example, you can start the AC on the way home from the beach or increase the heat and set up welcoming lights before the final run on the ski slopes! KABE Smart D Remote is integrated with a 4G router with an internal antenna and a mobile modem (external antenna is available as an option). In addition to controlling heating, lighting and monitoring the motorhome's functions and alarms via your cellphone, you also have access to a wireless internet connection.

KABE Smart D Remote* is available as an option.

* With your purchase of KABE Smart D Remote, a 36 month subscription is included. After 36 months, you will pay a yearly fee for the use of the app. A separate mobile data subscription is needed as well.
