KABE

Always a step ahead...

New places – Always at home

There are times when you want to relax and enjoy, without compromise. Maybe you want to go on an adventure and experience new things. And sometimes you need peace and quiet. Just like home, but in a new place. Always on your terms.

Our goal is to be a step ahead and surprise you with technology and features beyond the ordinary. Functions that elevate your lifestyle and increase your quality of life, no matter where you are. Our focus is always comfort and safety, along with smart solutions for a greater experience and a smooth holiday on the road.

Welcome home to your KABE!

KABE Estate 2022

Say hello to Estate

A new classic is born. We completely redesigned our Classic model, so much that it deserves a brand new name. Technically and practically the same caravan – in a new cooler shape.

KABE Estate is our entry model, a perfect first caravan if you are looking for a flexible solution for your travels or for the family with small children. It is available in a number of sizes and includes all KABE's built-in values such as superior quality and reliable year-round features. It is an affordable option with up-to-date design inspired by the pure simplicity of the 1950s. Our goal is a more focused experience, both as far as design and construction, cleaner lines and more locally produced materials.

The 50s kitchen with its angled overhead cabinets and sliding doors clearly inspired our designers. The look continues throughout the caravan, resulting in a more open and spacious interior with straight corners, details in black and updated wardrobe and entrance console design.

Overhead kitchen cabinets with a white matte finish blend perfectly with the rest of the caravan's interior. Both stylish and practical! Kitchen drawers sport a darker wood laminate in the colour Nussbaum Ombre. A black kitchen tap and matte black handles are the finishing touches.

Good lighting makes all the difference in your home and it is equally important in your caravan. We put a lot of effort into perfecting Estate's lighting. In the kitchen ceiling, you will find modern new lights that match our other light fixtures. Above the overhead cabinets, we've placed frosted mood lighting, as well as in corners and the divider between kitchen and seating area. Our spotlights now feature a matte black design.

How about the "soft" details? You can choose between two new upholstery options with new stitching details: modern Appleton in green and classic Belleville in black.

Estate has a new look on the outside as well. In 2021, we updated the rear with a new stylish design, which is also included in this year's model. The entire exterior features smooth panels with contrasting black window frames. Our unique decal graphics with a 3D feel completes this contemporary caravan – making it a trend-right statement on the road.

Read more on page 40.

EXTERIOR

A stylish expression

Design, safety and quality – those are the trademarks of every KABE caravan. You immediately recognize our sophisticated, yet classic caravan on the road. And as you get to know your KABE, with all its thoughtful details and features, you fully realize the value of our elaborate design.

All our functions are first rate, without compromise. As a matter of fact, we work hard to constantly develop and improve our caravans and strive to be at the forefront, or even a step ahead of the competition. So that we can offer you, the KABE-owner, the very best – a superior caravan with an exclusive feeling both inside and out.

KABE's unique exterior makes a stylish statement on the road. The elegant, smooth panels are standard in every KABE caravan. The Imperial series features Innovation Design graphics printed directly on the exterior panels. For a light and airy interior, all models have extra large windows. Our brake lights are specially designed with a KABE logo. The aerodynamic body and rear wing developed to reduce wind resistance. It's all about the details.

EXTERIOR – HOW WE BUILD

Connecting beams in floor

Extra beams between the longitudinal chassis joists provide more stable floors and an extra rigid chassis. Connecting beams for best possible stability. The chassis has outriggers from the longitudinal side beam, to relieve the weight pressure where the floor and walls are joined. The body can withstand very high loads, for example large amounts of snow on the roof.

Unique windows with smart details

Our smooth and tinted exterior window pane protects against heat. Integrated screens and blackout curtains are included. All windows, except the kitchen window, can be opened and an openable front window is now standard (not in Estate).

KABE Safety Driving System

Chassis with warm galvanized steel profiles. Electronically controlled anti-skid system, resulting in extra road safety (not in Estate, optional in Gemstone). Axles that provide comfortable and stable driving. Longer and stabilising tow bars. All models are equipped with a friction clutch. 8-layer tyres in our single axle caravans.

Butyl seals

Butyl tape retains its elasticity throughout the life of the caravan. We have therefore chosen to use this material throughout all sheet metal joints, overlaps and screw bushings. Approx. 20 kg of sealing compound is used in each caravan.

iWall technology

The body is built according to the "sandwich principle": outer sheet, 36 mm Ecoprim insulation, inner sheet and wall covering that absorbs any condensation. Ecoprim insulation is a moisture proof material with a 'closed cell' design. Our new iWall construction provides maximum stability and the body is absolutely water proof. Aluminium sheets on both sides of the Ecoprim insulation significantly reduce the impact of interior/exterior temperature differences.

Plastic beams

KABE uses plastic beams with integrated air ducts in all moisture-exposed parts of the body. Patent is pending for the KABE designed plastic beams. Our plastic beams have superior insulation properties.

Sealed roof joints

The joint between the roof and the wall is sealed with an elastic butyl compound. The exterior roof then overlaps the side walls to ensure water cannot penetrate. Zero leaks – guaranteed. KABE's unique iWall construction has an unlimited number of attachment points for installation of optional equipment.

Aluminium profile

Our in-house designed, extra wide profile in the joint between ceiling and wall. The profile has an air gap that ventilates the joint between wall and ceiling. The profile is mounted with double sealing strips and screwed together from two directions. Built-in awning rail on both sides of the caravan.

INTERIOR

Almost like home

To live in a KABE caravan is living with the highest comfort and quality in every detail, every day. All materials are selected with the utmost care, to live up to your expectations both in terms of aesthetics and durability. The design is current yet classic. Rest assured that your KABE will always feel modern, stylish and elegant.

A convenient home is a functional home. Every KABE caravan is filled with extra equipment, practical functions and solutions. Extremely comfortable beds are always included in your KABE, but often an option from other manufacturers. KABE is an investment in quality of life. There is a thought behind every detail, to provide you with the very best.

Let's take a look at the kitchen. The counter in dark faux stone, continues on the back wall where it connects with back lit plexiglass. The microwave is placed under the refrigerator, to make more room in the overhead cabinets while maintaining the stylish look in the kitchen. This solution is standard in Imperial and available as an option in Estate, Gemstone and Royal. A large compressor refrigerator from Dometic is available as an option in every model. In Royal, a Thetford stove with four burners and a convection oven is included. For the convection oven to work, you need to be connected to 230 V. If not, it will function like a normal oven. Do you prefer a stove with an electric burner? It is available as an option.

Our TDL models feature a spacious bathroom with a shower in modern design.

We provide practical and stylish living. Gemstone, Royal and Imperial feature recessed cabinet doors and drawers as well as a kitchen counter in modern faux stone. The entire interior has an exclusive, inviting and modern look with our light Nordic Oak wood laminate. Every single detail is carefully selected to create an overall uniform experience. Floor and wall coverings, plexiglass, counters, tables and consoles – all in complimenting shades such as Latte and Velvet Grey.

Every KABE caravan model is equipped with a sound insulating, fitted ceiling covering to eliminate both inside and outside noise.

Your bed is not only a place to sleep, you may want to curl up and read a book or a magazine for a moments relaxation. To make it as comfortable as possible, our headboard is covered in a soft material. The padded suede imitation with a printed 3D pattern has a naturally beautiful look.

MADE IN SWEDEN

Swedish design

The time spent in your caravan should be relaxing and worry free. We go all the way (and then some) in our quest to fill our models with as many smart solutions, functions and features as possible. Our KABE caravans are created with one goal in mind – to provide you with the very best.

Behind the stylish and elegant exterior, there are many quality features. You will find unique construction and advanced technical solutions. Ergonomic sofas, adjustable beds with comfortable spring mattresses, flexible kitchens with everything you need (and more) as well as the finest upholstery and textiles. These are a few examples of conveniences you immediately experience in your KABE.

In addition, it is important that everything is user friendly. After all, this is a mobile home built to travel safely, securely and eco-friendly on the roads. Many "extras" are simply standard in our caravans.

Would you like to find out more? See page 16.

2022 upholstery collections

Further enhancing the designer look, our cushions feature extra stylish stitching details. This years collection includes four fabric options and three in leather. Our new Estate models offer two fabric collections to choose from, with their own stitching details to match the brand new interior.

INTERIOR – HOW WE BUILD

Ski-box and cargo hatch

Pull-out, heated ski-box with lighting. An indicator on the light switch in the caravan shows whether the lighting is on or off. Cargo hatch under the bed with built-in air flow ducts and opening that is equipped with our in-house designed convectors – provides best possible heat in the bedroom area. Cargo hatch for easy access to the cargo space under the bed (standard in Royal and Imperial).

Superior bed comfort

Beds are equipped with a spring mattress and thick top pad, for a good nights' sleep (not in bunk beds). And for extra comfort and reading in bed, our headboard is adjustable (not in Estate). Electric adjustable headboard, standard Imperial, option in Gemstone (comfort package) and Royal. Several models can be equipped with a combined upper bed / upper cabinet.

Convenient in the bedroom

A ventilation hatch is located in the bedroom area. You can easily and quickly air out the caravan. At the side of the bed, a Velcro, movable magazine compartment is provided. Under bed compartment with lighting.

Safe and secure

Fire alarm located in the bedroom area. Ground fault circuit breaker.

...more comfort details

Fitted bed slats support your body in bed. Beds with fold-up function and soft-close for more efficient cleaning. Under bed cargo space with our in-house designed convectors at the opening of the cargo hatch – provides better heat in the bedroom area. Headboard with cosy lighting.

Premium upholstery and textiles

Extremely durable, premium quality upholstery throughout. We present seven collections to choose from. You can combine curtain set with upholstery options. Curtain sets are available in two looks – modern panel curtains or classic, elegant curtains with a valance.

Kitchen

Kitchen table with an integrated extension provides additional space (not in Estate and pedestal tables). Practical pull-out wire shelf in the kitchen. Kitchen counter with plenty of space. Large refrigerator with freezer, 190 litre (standard in Royal and Imperial).

Drying cabinet

Drying cabinet includes our in-house designed drip tray for shoes drying and a special convector as well as an adjustable roof valve for maximum heat circulation. Heated shoe box inside door. Entry wardrobe for coats and jackets.

Best seating comfort in the market

Ergonomically designed sofas with durable, recycled Premium Foam cushions.

Adjustable sofas

Provides more efficient cleaning. Head rest and decorative accent pillows (standard in Royal and Imperial). Slide-out is standard in Imperial.

KABE-quality interior and carpentry

Interior and furniture construction from KABE's own carpentry.

Soft, light reflecting and insulating ceiling

KABE is the only manufacturer to feature an exclusive 'soft ceiling' design, with better acoustics inside the caravan. Our 'soft ceiling' absorbs sound and improves the ceiling's insulation properties.

Lots of lighting throughout

Light fixtures with built-in spotlights. Our Royal and Imperial models feature lighting in windows in the front seating area. Night light with a switch located by the bed. Interior light switch for exterior lights, lighting in gas case and ski-box. Lighting in wardrobes and under bed space.

Bathroom with a shower

Our different models include shower stall, water-proof wall covering, extendible hand shower and shower curtain. Many floor plans feature a walk-in shower. Bathroom door lock. Outside shower outlet with both warm and cold water (standard in Royal and Imperial).

Well-equipped kitchen

Two speed, built-in kitchen fan with lighting and removable grease filter for easy cleaning. Stove with electric ignition. Market-leading refrigerator ventilation system with roof vents.

Sealed windows

Energy efficient windows with a polyurethane frame is KABE's own type K D-Lux construction. The polyurethane window frame sealed against double pane window provides maximum insulation. The window frames are insulated with built-in ventilation.

KABE Caravan heating systems

YEAR-ROUND-USE Smart comfort

The Scandinavian climate is extremely challenging – we know. It can vary from warm and dry summer, to wet and breezy autumn and really cold winter with lots of snow. This requires superior heating, insulation and ventilation, to make your caravan both safe on the road and comfortable to live in year-round. With more than 60 years experience and continued product development, we can proudly say that every KABE caravan lives up to the toughest requirements, and more.

Every KABE caravan is constructed for maximum air circulation. The careful design and placement of furniture result in optimal air flow. Our under floor heating system distributes the heat evenly over the entire floor and our patented iWall construction provides the best possible indoor climate.

Our technical innovations together with our unique heating and ventilation solution (Smart Climate System), make your KABE the best year-round caravan on the market.

Alde zone heating is standard in our Imperial models. With this system you can control the heat in two separate zones, in the rear and in the front of the caravan. The bathroom is always economically heated on the return loop.

Our goal is to make your winter vacation as comfortable as your summer travels. We leave nothing to chance.

Would you like to find out more? See the following pages!

HEATING AND VENTILATION – HOW WE THINK

SMART -CLIMATE+ SYSTEM

Intelligent heating system

We know that we need to do everything we can to make you happy. That's why the following is always included, in every KABE caravan: AGS II or AGS II Pro waterborne under floor heating, maximised convector length and tightly fitted convectors, optimised ventilation system, interior adapted for maximum air circulation, iWall construction and ALDE Compact boiler.

Central heating

ALDE Compact 3030 boiler with a touch screen display and 3 kW power elements, operates with gas and resulting in max 5,5 kW (5500W). The heating system has a 12 V circulation pump, integrated water heater and separate expansion vessel. A cover is placed around the gas unit for the most efficient hot water effect. Roof vent for maximum operational reliability.

Optimal air circulation

Our interior design is adapted to provide optimal air circulation throughout the caravan, even behind cabinets and sofas. The distance between sofas and beds as well as the angle of the sofa backrest is carefully calculated.

Angled cable trays

Maximum heat is absorbed from the convector and accelerates the warm air past the windows. Our unique and specifically located cable trays are angled to allow the air to flow freely past the windows. The electrical wiring, water and waste water pipes are hidden in the cable trays. In winter, this construction quickly thaws residual water in the pipes.

AGS II Pro

With AGS II Pro (standard in Gemstone, Royal and Imperial) you can turn on the under floor heating separately. A shunt valve regulates the temperature of the water circulating in the floor. To reduce energy consumption, the system is interval controlled. The water is circulated in the system during certain pre-set time periods – thereby reducing the energy consumption in the boiler and at the same time protecting the battery.

Integrated heating system

The floor heating system is connected to the convector system – circulating the air throughout the caravan when the heat is turned on. The system is powered by both gas and electric. KABE is constructed with extra wide convectors under all windows.

Free airflow

Our overhead cabinets have built-in air ducts, to let warm air pass freely by the joint between the wall and ceiling and advance it towards the middle of the caravan. A partition in the outer edge of the cabinets, keeps the channel open even when the cabinets are filled.

Ventilated sofas and beds

Sofas and beds are spaced out. Sofa back rest and cable trays are angled to accelerate the airflow past the windows. The sofa back rest and the air space by the beds are heated when warm air is distributed along the wall.

Superior heating and comfort

Developed in-house and patent pending, KABE's automatic waterborne under floor heating system, AGS II, features four loops that provide more even heat distribution. The heat is circulated in aluminium pipes reaching all the way to the entry door, kitchen cabinets and bathroom. Heating plates distribute the heat evenly across the entire floor.

Inner sheet in walls

KABE's sandwich construction consists of an outer plate, Ecoprim insulation, inner plate and wall covering. The heat from the radiators advance up along the walls. The inner plate in the wall distributes the heat evenly across the entire wall, whereas plywood walls, for example, do not conduct any heat at all. Floor heating is distributed via heating plates in the floor.

Optimised ventilation system – patented KABE VarioVent

Our patented ventilation system enables regulation of the amount of fresh air as needed. The system is equipped with a ventilation opening which can be operated with a slider.

Automatic power monitor

The boiler automatically detects when gas is needed for increased power. Winter time, you can easily start the electric element and circulation pump by switching on the winter connection and connect electricity (230 V) to the exterior electrical outlet.

Ventilation in walls and floors

KABE is the only manufacturer to feature a ventilated wall covering that lets the warm air through that is distributed up along the walls. Low level condensation near the floor is captured by the ventilated carpet, positioned along the outer edges, and dries up when you turn on the heat. Our insulated walls and windows provide heat in the winter and cools the caravan in summer. In addition, KABE's wall covering has a sound-proofing effect.

Balanced heat distribution

KABE's caravans are built for optimum heat distribution. Our design allows the warm air to pass freely from the floor, under beds and sofas, and up to the ceiling through our ventilated overhead cabinets. Ensuring your KABE has the best and most evenly distributed heat possible in the living area as well as other spaces.

Load monitor

The boiler's power consumption of electricity is automatically reduced during particularly heavy loads, for example when several electrical appliances are running at the same time.

Additional heating features

To avoid cold drafts, we take extra care with the insulation around fresh air intakes and heat convectors. The insulation contributes to optimal heat exchange and eliminates cold drafts in the caravan. With double temperature sensors, one in the bedroom area and one in the front seating area, the heat can be adapted to where you are in the caravan.

SAFETY In every detail

We have great respect for the challenges you may face on the Scandinavian roads. A few examples are wet, slippery surfaces as well as rapid temperature changes. We devote much time and many resources to keep you safe on the road. When you invest in a KABE, we deliver a caravan that is built in one of Europe's most modern caravan factories, and developed to make your driving experience as safe and comfortable as possible.

All KABE caravans are equipped with our own KABE Safety Driving System. This system provides ultimate road safety.

KABE Safety Driving System includes a chassis with longer tow bars and an anti-lurch axle. In our Royal and Imperial models, an electronically controlled anti-skid system is also included. If the caravan starts to skid, the system will detect the problem within a few thousandths of a second and stabilise the car and caravan immediately by braking smoothly. A friction clutch is standard in all KABE caravans, as well as 8-layer tyres that can withstand stress a little better.

KABE Safety Driving System. Chassis with warm galvanized steel profile. Electronically controlled anti-skid system (not in Estate, available as an option in Gemstone) provides extra road safety. Longer, stabilizing tow bars.

Extra rigid chassis. Extra beams between longitudinal chassis joists result in more stable floors and an extra rigid chassis. Connecting beams provide the best stability possible. The chassis has outriggers from the longitudinal side beam, to relieve the weight pressure where the floor and walls are joined. The body can withstand very high loads, for example, large amounts of snow on the roof.

Tyres and clutch. Our single axle caravans feature 8-layer tyres. 14" steel rims are standard in Estate and 14" aluminium rims are available as an option with the Design Package. 15" aluminium rims are standard in Gemstone and Royal and 17" Diamond Cut aluminium rims in Imperial (available as an option in Royal). All models include friction clutch.

CLIMATE CHAMBER
The caravans are carefully tested in our climate chamber.

-35 TO +55 DEGREES
Our caravans are tested in temperatures from -35 up to +55 degrees.

QUALITY
With the help of thermal cameras, we ensure that the construction reaches exactly the quality we strive for.

COMPLETELY WATER PROOF
Brand new technology is used to check that the caravans are absolutely water proof.

OPTIMISED WEIGHT DISTRIBUTION
Scales are used to balance and optimise the weight distribution between axles.

TOWING CAPACITY
Measuring equipment is used to check towing capacity.

DURABILITY
Pressure is used to test the strength of the caravans.

AIRFLOWS
Airflows are carefully checked with smoke.

VENTILATION
Correct ventilation is vital and it is carefully tested.

GAS
The gas system is pressure tested.

ELECTRICAL SYSTEM
Electrical systems and other important functions are carefully checked before our caravans can leave the factory.

DURABILITY TEST
Durability tests are performed and simulated with equipment corresponding to 10,000 km of normal driving.

RAIN CHAMBER
In the rain chamber, the caravans are tested with a high pressure sprayer.

BODY ENDURANCE TEST
Endurance tests are performed on every part of the body.

MANUFACTURING
We use state-of-the-art technology to manufacture our caravans.

CAREFULLY TESTED Vital solutions

You will find stylish design and high quality, everywhere you look. We perform thorough tests on every little detail and function. For example, the caravan is tested in our climate chamber to manage temperature differences of up to 90 degrees. Brand new technology is used to make sure your caravan is absolutely water proof. We also test endurance, durability, air flow, electrical systems and much more. Every requirement in every area must be approved. It's a matter of KABE quality.

On the home page, you can see lighting controls and digital sliders for dimmers. Inside and outside temperature as well as time are also displayed.

All information about heating is displayed on a separate page. You can easily adjust the heat with digital sliders.

Current status information about fresh water level, waste water level and battery voltage is clearly displayed.

With Smart D you can manage functions in one place. You can control the refrigerator, AC, AirVent and more – all in one easy-to-view display.

TECHNOLOGY

KABE Smart D

KABE SMART D control panel monitors your caravan. It's also used to manage functions. The panel is designed with a focus on user friendliness and features a touch screen display that is easy to understand. It shows fresh water level, waste water level and battery voltage. You can control lighting, AC, boiler and temperature. In addition, the system includes several alarm functions and will remind you to make a service appointment or let you know if a fuse has tripped. All conveniently displayed on one screen. Standard in Royal and Imperial.

Which language do you prefer to navigate your KABE Smart D? Just like your smart phone, you can simply select the language.

KABE Smart D Remote app enables you to manage the control panel remotely, from anywhere. KABE Smart D Remote is built together with a 4G router with an internal antenna and a mobile modem (external antenna is available as an option). In addition to managing heating, lighting and keep track of the caravan's functions and alarms via your cell phone, you have access to a wireless internet connection on the road. KABE Smart D Remote is available as an option in Royal and Imperial*.

The large AGM 130 Ah battery will not freeze and has a large capacity to absorb higher currents and has a lower self discharge. On the Smart D panel, the battery sensor displays how your battery is functioning and how long the battery charge will last for different consumption (included with SmartVent or the Eco-Package).

KABE SMART D – EUROPEAN INNOVATION AWARD WINNER

* With your purchase of KABE Smart D Remote, a 36 month subscription is included. After 36 months, you will pay a yearly fee for the use of the app.

NEW! MULTIMEDIA SYSTEM WITH DAB. Multimedia-player with DAB (Royal). KABE premium sound system with DAB is standard in Imperial.

WIRELESS CHARGER. A wireless cell phone charger is standard in Royal and Imperial. The charger is located in the front of the caravan.

WIRELESS ROUTER. To maximize your media options, a router for wireless internet connection is standard in all models. An external antenna for the router is available as an option.

TECHNOLOGY – HOW WE DO IT

KABE Smart D intelligent electric control unit

User friendly electric panel. The electrical system detects battery power and is automatically charged when needed. The system tracks water levels, temperature and battery voltage (standard in Royal and Imperial).

Electrical box

Electrical box with 230 V socket and 16 A circuit breaker with ground fault circuit breaker, control lamps for electricity, 230 V / 12 V outlet, TV outlet for cable TV and outside TV (not in Estate). Controls that indicate the power supply. Electrical box with lighting (standard in Royal and Imperial). Battery charger for 25 / 30 A.

More sound and visual

Sound / media centre (standard in Royal and Imperial). Built-in speakers in the front of the caravan. DAB radio is standard in Estate and Gemstone. Wireless router is standard in all models. Adjustable TV mount is available in many of our models.

Gas control

The gas unit is integrated in the front of the caravan. There is room for two gas tanks as well as luggage. The gas unit has a frame on the bottom to keep everything in place when you open the hatch. It also features lighting, an external gas connection, a leak indicator for manual control of the gas system and a removable fitted protective mat.

Charged for TV reception

Electronic TV antenna for both analogue and digital reception. Exterior connection for TV, cable TV and 12 / 230 V. Equipped with TV antenna outlet in three places: media console, bedroom area and the electrical box.

OWNERSHIP

Stress free and secure

10 reasons to choose KABE:

YEAR-ROUND COMFORT

KABE caravans and motorhomes are designed for the Scandinavian climate, to keep you equally comfortable in the middle of winter and on warm summer days. When it comes to insulation, ventilation and heating – we go all the way. For maximum stability and complete moisture control, the body is built with KABE's own iWall system. Every model features the Alde 3030 boiler and waterborne under floor heating is standard. Many of our important year-round functions are built into the design, and do not attract attention when you first enter your motorhome or caravan. However, you will notice the difference when you start using your KABE.

QUALITY

Our goal is to deliver market-leading quality and superior design, in every detail. That's always been our focus, for more than 60 years. We develop and test new solutions in our own state-of-the-art facilities in Tenhult, Sweden and every KABE is built here as well. It is one of Europe's most modern caravan and motorhome factories. With skilled employees, our own electricians and our own joinery producing interior fittings. And our subcontractors are among Europe's leaders in every category.

RESALE VALUE

No matter which model you choose, you can be sure KABE delivers market leading quality in every price segment. Quality that endures. We work constantly to improve our caravans and motorhomes, our goal is to always deliver a vehicle that meets yours and the next owner's requirements. You can rest assured that your KABE will maintain a good resale value.

TECHNOLOGY

Your new KABE always includes cutting edge technology and is one of the most well-equipped caravans in the market. Future challenges require solutions for the future and we put a lot of effort into technology development. In the past few years, we have received several prestigious awards for our innovations, e.g. in ventilation and heat recovery. We do everything possible for an extremely comfortable experience on the road.

CLIMATE AND ENVIRONMENT

From material selection and production technology to energy efficiency and emission levels – environmental issues are of the highest priority and we are committed all the way. We make great efforts to lead the way to an increasingly eco-friendly caravan and motorhome industry. Naturally, we support the UN's global goals of sustainable development and better working conditions, increased diversity, gender equality, as well as maintaining a high level of business ethics.

SAFETY

When you buy a KABE you invest in safety. We want you to feel secure in your investment and fully enjoy life in your caravan or motorhome. A 7 year warranty on water infiltration is included with all new models. Your safety on the road is extremely important, and our caravans and motorhomes are equipped with many active safety systems. In case of an accident, your KABE includes many carefully developed passive safety systems to protect you.

FUNCTIONALITY

KABE has more than 60 years' of experience developing and building caravans and motorhomes for active, year-round use. You will find many smart solutions, making life in your KABE as convenient and relaxing as possible. Some examples are our practical pull-out ski box with lighting, central lock on lower kitchen cabinet doors and drawers and perfectly placed USB outlets placed exactly where you need them!

DESIGN

Our modern and spacious interior in light colours and materials, is truly Scandinavian design at it's best. Recessed cabinet doors, rounded corners and ergonomic seat cushions are examples of details that create the special KABE experience. It's the perfect balance between design and function, inside as well as outside. The exterior with carefully developed features and elegant lines give each KABE it's distinctive character.

AUTHORIZED DEALERS

KABE has a wide network of authorised dealers and service stations, not only throughout Scandinavia, but in several European countries as well. They provide expert advice and help you with financing and insurance for your KABE. And once you are on the road, we have more than 100 authorised service stations in northern Europe. You will always find professional help, should you need it. Many have worked with us for decades. You are in safe hands!

OPTIONS

There is a KABE for everyone. All you have to do, is figure out which size, floor plan, equipment and price level is right for you and your family. And when you find your favourite model, you can select the optimal floor plan with KABE's Flexline System. There are many options and great flexibility. The easiest way to build your KABE is in our online product configurator. Choose "Build your KABE" from our home page www.kabe.se/en, or visit one of our dealers.

Choosing a KABE is easy

Create your dream-KABE in peace and quiet, on your computer. You can easily view all available options and possibilities in our flexible configuration tool at kabe.se/en. Choose everything from model and floor plan to details such as upholstery and optional equipment. A summary of your caravan will be presented, including price and contact information for the nearest dealer.

It could not be easier!

2022 MODEL PROGRAMME

There is always a perfect KABE

We have developed four model series, each with unique features, to suit the different needs of our KABE owners. Whether you choose a slightly smaller caravan or a larger model, you can be sure it includes year-round comfort, excellent quality, safety and smart solutions. No question about it.

KABE series and models:

ESTATE
Entry model with KABE quality all the way.

GEMSTONE
For those with high demands on basic equipment and comfort.

ROYAL, ROYAL HACIENDA
Models that are at the forefront of technology with superior equipment.

IMPERIAL, IMPERIAL HACIENDA
Our premium caravan series.

KABE FLEXLINE

Your personal floor plan

Selecting the right floor plan for your caravan is as important as when you buy a permanent home. We all have different needs. That's why we created KABE Flexline, a flexible system where you can tailor your caravan to your personal requirements.

Choose floor plan in 4 easy steps:

1. CHOOSE MODEL AND LENGTH

We offer four caravan model series.

Model	Interior length
Estate	473-720 cm
Gemstone	473-600 cm
Royal / Hacienda	522-940 cm
Imperial / Hacienda	550-940 cm

2. CHOOSE WIDTH

You can choose between two widths.

Model	Interior width
Standard	215 cm
King size	235 cm

3. CHOOSE BETWEEN 3 FLOOR PLAN SOLUTIONS

GLE: Bathroom and shower are placed along the left side in the middle of the caravan.

XL: Bathroom and shower are placed in the right, rear corner.

TDL: Bathroom with a separate walk-in shower spans the entire width of the caravan's rear.

4. CHOOSE BETWEEN 12 FLEXLINE OPTIONS

GLE

Select a floor plan...

XL

Select floor plan...

TDL

Select a floor plan...

There are many models and family options with bunk beds!

Standard equipment included in all KABE caravans:

KABE Estate 2022

A favourite amongst many families, our Classic series is updated with a new design and a brand new name – KABE Estate. To suit the needs of our families with young children, KABE Estate offers a number of solutions in different lengths. Choose the size and floor plan that is right for you and your family. Additionally, Estate is available in a smaller, lighter model, but with all KABE's built-in values such as superior quality and reliable year-round features.

New Estate has a pure and modern design throughout. The large windows in the kitchen and living area from Classic are included, but this new floor plan is much more open and spacious. Clean lines and angled cabinets overhead in a matte white finish combined with Nussbaum Ombre dark wood laminate set the tone for the interior. Counters and table tops with square corners along with details such as kitchen tap and light switches in up-to-date matte black. As in all KABE caravans, the kitchen is well equipped with many storage solutions. With a lid to cover the kitchen sink, you have a more cohesive counter space. Estate's new kitchen counter features a faux stone look, tables and console tops are finished in the shade Diamond White.

The lighting in Estate is carefully considered to give a warm yet contemporary feeling, with light strips along the ceiling and under overhead cabinets and a brand new ceiling light in matte white with contrasting wooden edges.

In the bedroom area, the headboard is covered in a soft material. Cosy and stylish at the same time.

The well-thought-out details and modern design, naturally continue into the bathroom. The bathroom counter is updated with a new laminate. Tap and towel bars are matte black, just like in the kitchen. Shower curtain and track are both included.

We've updated the exterior completely with smooth panels and decal graphics with a 3D look. The exterior window frames are contrasted in black as well as the grille of the ventilation hatch. Estate is built on a Knott chassis with self adjusting brakes.

NEW in Estate!

- ▷ Brand new design, exterior and interior.
- ▷ Matte white finish overhead cabinets.
- ▷ Updated kitchen cabinets and counter. Kitchen drawers in Nussbaum Ombre.
- ▷ Matte black kitchen tap and matte black fittings, handles and hooks.
- ▷ New design overhead kitchen cabinets. Lighting above the cabinets and new kitchen fan lighting.
- ▷ Bathroom counter and TDL-shower walls are updated with a modern concrete look.
- ▷ Shower curtain and track are both included.
- ▷ High quality, comfortable beds with a top pad.
- ▷ New reading lights, light switches and outlets.
- ▷ Diamond white laminate table, media console and entrance console.
- ▷ Matte white ceiling light with a wood moulding.
- ▷ New design entrance console and wardrobe inside front door.
- ▷ New floor covering.
- ▷ Two brand new fabric collections: Appleton in green and Belleville in black.
- ▷ New water tank cover and lock.
- ▷ Knott chassis with self adjusting brakes.
- ▷ Smooth exterior panels and decal set with a 3D look.

KABE Gemstone 2022

In 2022, the Gemstone series has been updated with a number of exciting details. A new ceiling light in faux suede, track lighting with a wood laminate and a new bathroom counter are a few examples. All designed to compliment our Nordic Oak interior and with new shades for wall and floor coverings and laminates.

You will find many exclusive details, such as the rounded kitchen sink with its stylish tap, separate silverware drawer, quality stove top and a cutting board made from carefully selected beech wood. The 3-burner stove with its split lid cover adds a smart extra space. For a more stylish look, the back wall in the kitchen in Nordic Oak matches the overhead cabinets. New kitchen lighting and compact spotlights with USB outlets were added last year. This year, a kitchen fan light and lights under the overhead cabinets are new additions.

The living area is the obvious place to relax and socialise and our ergonomic seat cushions in Premium Foam provide superior comfort. All seat cushions feature an anti-slip underside to keep them in place.

For ultimate convenience, our models are equipped with more USB outlets than ever before, even in the bunk bed.

Other practical updates are a water tank cover lock and a front window that can be opened. Included in all Gemstone models. Choose a TDL shower with walls in a modern concrete look. Our exclusive, new 15" rims elevate the overall Gemstone feeling.

With AGS II Pro, you can turn on the floor heating separately. A shunt valve regulates the temperature of the water circulating under the floor. To reduce energy consumption, the system is controlled via time intervals. The fluid in the floor heating system is circulated at certain pre-set times – which keeps the energy consumption to a minimum and protects the battery.

Microwave located under the refrigerator is available as an option.

NEW in Gemstone!

- ▷ Kitchen counter laminate is extended on the back wall and connects with backlit plexiglass.
- ▷ New ceiling light covered in modern faux suede and new lighting in the built-in kitchen fan.
- ▷ Bathroom counter and TDL-shower walls are updated with a modern concrete look.

KABE Royal 2022

In 2022, we introduce a number of practical and aesthetic updates. New surround lighting and ceiling light covered in faux suede as well as an updated bathroom counter are a few examples. Last year, our TDL models were equipped with a larger shower in a modern design.

Digital Audio Broadcasting (DAB) is included with the multimedia player.

Additional practical updates are a front window that can now be opened and a new water tank cover with a lock. All Royal models feature 15" rims with our exclusive design and new 17" rims are available as an option.

As soon as you step into the caravan, our Nordic Oak interior with its white-washed look, sets the tone. The balance of the interior is adapted to match the warm and modern "designer feel".

In the Royal kitchen, there is no room for compromise. In addition to all the features in our well-equipped Gemstone kitchens, a

Thetford gas stove with four burners is included along with a convection oven. The caravan must be connected to 230 V in order to operate the convection oven fan. If not, the oven works like a normal oven. In our unique front-kitchen models, the kitchen is located in the front of the caravan, and features updated lighting.

Dometic's innovative refrigerator with double hung doors for fridge and freezer, can be opened by gripping the aluminium moulding on either side of the door. A larger compressor refrigerator from Dometic is available as an option.

A wireless charging station for your cellphone is included in our Royal models. It is placed in the front of the caravan.

For ultimate comfort, our headboard is covered in soft, padded faux suede with printed 3D graphics for a stylish and natural look. To complete your bed, a superior quality spring mattress with an extra thick top pad is included.

NEW in Royal!

- ▷ Openable front window is included.
- ▷ New ceiling light covered in modern faux suede and new lighting in the built-in kitchen fan.
- ▷ Our models with the kitchen located in front, feature new light fixtures covered in faux suede, just like the new ceiling light.
- ▷ New multimedia player with DAB.
- ▷ Kitchen counter laminate is extended on the back wall and connects with backlit plexiglass.
- ▷ Bathroom counter and TDL-shower walls are updated with a modern concrete look.
- ▷ Four fabric upholstery collections to choose from, Appleton in green and Hamilton in brown are brand new this year.
- ▷ New 15" rims in our own design.
- ▷ New water tank cover and lock.

Royal 520 XL

KABE Imperial 2022

You will find our most elaborate interior in Imperial. The front of the caravan features beige overhead cabinets with a modern anthracite gray detail. In the rear, the overhead cabinets are finished in Nordic Oak. In addition to the features from our other models, Imperial is equipped with an induction stove top with two separate gas burners. The microwave is placed under the refrigerator to create extra space in the overhead cabinets and to maintain the aesthetics of the kitchen.

The living area is stylish with carefully selected, exclusive materials and timeless design. This year's models have updated light fixtures and a new ceiling light covered in faux suede. You can relax in our comfortable sofa with leather upholstery. The front window is now openable in all Imperial models.

Already in 2021, our TDL models were equipped with an updated, larger shower with faux stone walls. The bathroom counter in Imperial is finished with a new, up-to-date laminate this year.

With our KABE Smart D Remote app, you can manage the control panel in the caravan from anywhere. Available as an option in our Imperial models.

To maximise your media options, a wireless router is standard. Imperial includes a new multimedia player with DAB and Premium Sound System. Relax and enjoy your favourites!

Imperial features new, exclusive 17" rims in Diamond Cut finish – completely unique for KABE.

In our Imperial series, Fresh Jet air-conditioner is included to make you as comfortable as possible, even on hot summer days.

NEW in Imperial!

- ▷ Our models with the kitchen located in front, feature new light fixtures covered in faux suede, just like the new ceiling light.
- ▷ Openable front window is included.
- ▷ Bathroom counter and TDL-shower walls are updated with a modern concrete look.
- ▷ Kitchen counter laminate is extended on the back wall and connects with backlit plexiglass.
- ▷ Heki 2 with laminate covered surround lighting.
- ▷ New ceiling light covered in modern faux suede and new lighting in the built-in kitchen fan.
- ▷ Four fabric upholstery collections to choose from, Appleton in green and Hamilton in brown are brand new this year.
- ▷ New multimedia player with DAB.
- ▷ New 17" rims in Diamond Cut design.
- ▷ New water tank cover and lock.

Imperial 560 XL

KABE Imperial features our exclusive exterior KABE Innovation Design. Imperial 560 XL is a compact model, but with all the special features of the larger Imperial models.

OPTIONS Royal, Imperial

Give your KABE that little extra. We know what's needed for comfortable caravan living. Every KABE includes a generous list of standard equipment. To be honest, we offer many details that our competitors charge extra for. But we all have different needs. A wide range of options are available to complement your caravan and create the perfect solution for you and your family.

BODY

17" aluminium rims (standard in Imperial)

Tandem axles (Royal 740 DGDL, Royal / Imperial 630 TDL, Royal 630 TDL FK, Royal 630 GLE. Standard in Imperial 630 TDL FK)

Total weight:
 • 2000 kg (standard in Imperial)
 • 2650 kg
 • 2800 kg

Electric step

Panorama window in the front (only in KS, standard in FK)

Tinted windows

Entry door with tinted window

Fresh Jet FJ 2200 air-conditioner (standard in Imperial)

Solar panel. Produce your own electricity! Environmentally friendly, easy and practical. The superior quality solar panel package from GoCamp provides 140 W. The panel's frame is constructed in heavy aluminium, with aerodynamic spoilers that reduce the wind noise when driving.

If you are free camping, the options large battery and solar panel are recommended.

Alde Flow. With Alde Flow you can take a warm shower for as long as you like! Alde Flow is a separate warm water tank that can be connected to the glycol heating system. The tank preheats the fresh water before it reaches the boiler's ordinary hot water heater and provides constant flow of warm water.

SmartVent. A new, smart ventilation system is available as an option for Royal and Imperial. The ventilation is automatically controlled according to temperature and the amount of carbon dioxide and hydrocarbon in the air. The system consumes 7 percent less energy in cold weather compared to traditional ventilation and provides a higher quality of incoming air. A special filter reduces the amount of particles in the air and adjusts to a higher air exchange when the air becomes polluted.

Water purification system – Alde AquaClear UV-C (Alde Compact 3030 boiler). Efficient water purification that protects the user in a gentle and eco-friendly way. Unwanted viruses and bacteria, pesticides and chemicals are removed. The water is disinfected with UV-C light generated from LED's. In addition, the water passes through a carbon filter that removes any odour, bad taste and colour.

KITCHEN

Compressor refrigerator. Refrigerator with a 12 V compressor. Provides a spacious refrigerator with a generous freezer compartment.

Micro under the refrigerator (standard in Imperial)

Electric burner for the stove (Royal)

LIVING ROOM

Table column, loose

Madison leather seating
 • Front seating
 • Front seating + middle dinette (standard in Imperial)

Bloomington leather seating
 • Front seating
 • Front seating + middle dinette (standard in Imperial)

Rockford leather seating
 • Front seating
 • Front seating + middle dinette (standard in Imperial)

Electric headboard (standard in Imperial, not in E9 bed)

CLIMATE / HEATING

Upper bed cabinet with doors (only certain bedroom solutions and middle dinette area)

Fitted carpet

Drawer under bunk bed (B14, E9)

Grand Lit B2 (extra large bed) – convert two single beds to one double bed (only in GLE)

BATHROOM

Shower floor in wood – Royal, Imperial (TDL, DXL)

Thetford toilet with a ceramic bowl (standard in Imperial)

Cinderella combustion toilet. Cinderella is a modern and environmentally friendly toilet solution with a large capacity and high operational reliability. Paper, urine and faeces are burned at a high temperature resulting in a minimal amount of ash, about one cup per person per month. Clean, hygienic and odourless (TDL models Royal and Imperial).

Mirrored TDL bathroom is offered in the following Flexline solutions: E2, E8 (except C600TDL and R/M630TDL FK)

ELECTRICAL / TECHNOLOGY

Shower instead of cabinet (XL)

Fan in the shower stall (TDL)

Electricity meter in the electrical box

130 Ah AGM battery incl. case

KABE Smart D Remote. KABE Smart D Remote* enables you to manage the control panel remotely, from anywhere. KABE Smart D Remote is built together with a 4G router with an internal antenna and a mobile modem (external antenna is available as an option). In addition to managing heating, lighting and keep track of the caravan's functions and alarms via your cell phone, you also have access to a wireless internet connection on the road.

* With your purchase of KABE Smart D Remote, a 36 month subscription is included. After 36 months, you will pay a yearly fee for the use of the app.

Duocontrol. Duocontrol has a built-in automatic gas switch, reduction valve and collision sensor which is triggered on impact with a G-force of 3.5 G. The supply of gas is shut off immediately to avoid a gas leak. Duo Control is approved in all of Europe and allows the gas to be on while driving.

Mover:

- Tandem axle
- Single axle

Converter DC121210 – Booster
(reinforced charge while driving)

ADDITIONAL EQUIPMENT

External antenna router

Direct drain – waste water bypass tank (standard in Imperial)

City water

70 litre water tank (not in Imperial 560 XL / 600 XL)

ECO PACKAGE

130 Ah AGM battery

Battery sensor

AirVent

Solar panel

This package is perfect for those who want the freedom to camp anywhere for a long period of time, without worrying about the supply of electricity. AirVent replaces AC and provides a more energy efficient cooling of the caravan. The 130 Ah AGM battery is more durable than an ordinary battery and with solar panels on the roof you produce your own electricity.
